

Fairhope, Ala.

W-1951

Gulf Coast Br. Exp. Sta. (Oto Brown, Supt.)

6/18/46. Siggers reports the 13 seedlings Craudall had heeled in for planting up the blanks, are all surviving. Two or three of Craudall's original seedlings, now 10ft tall, while about the same number have never grown & now less than a foot high.

Fairhope, Ala. Otto Brown, Supt.

~~S. C. Brown, Supt.~~
Gulf Coast Branch Experiment Station.

10/22/38 - Dr. Cross advised that one tree bore nuts in July of this year. G F S inquired about it.

1940. Map in file. See 1936 shipment attached. (B.S. Craudall has records at Athens, Ga.)

5/28/45 - P.V. Siggers reported "seedlings in general had put on good growth this year and are now pretty well established." --- "Last Nov. I replanted the 'blanks' in the plantation with seedlings that Bowen had heeled in near the NE corner of the area. --- think all the trees survived the transplanting. 97% of seedlings in plantation are alive."
