5	M-16 " Hybrid
5	S-8 Hybrid O.P.
5	FP-783A " "
5	RB-1 Crenata moll. high O.P.

Of the trees received in 1933 about 10 are dead due to the prolonged drought of that summer and difficulty of giving them sufficient water. They have had the soil regularly cultivated for a generous circle about each tree and a mulch of hay during the summer each year, removed in the fall to avoid harboring mice.
