on history of his hybrids # 1, 2, 3, 4, 5, Mar. 1930
number.

93. Chinkapin, not grafted. These bear heavily every year notwithstanding the blight. From the same root common chinkapin will keep on bearing year after year. When one stock blights another takes its place so that heavy continuous bearing is the rule.
94. Original No. 1 Morris hybrid chinkapin (C. pumila x C. dentata). Nuts of size and quality of American sweet chestnut. Tree blighted in its 13th year after bearing crops for 8 or 9 years. New stump sprouts now growing.

From No. Nut Grow. Assoc. Rept. Proc. 15th Ann. Meeting, New York City, Sept. 3-5, 1924.
