Henry G. Hopper

4/11/36 20 MZ Castanea mollissima

May, 1936 - "The trees were in bad condition when received. The packing and roots were dry. I set out and watered and have been watering them since. Only three or four have leaves on them some few others look green and some are dead to ground." 2½ mi NW of Buffalo & 1 mi W Tampeco.

July 1946 - 2 trees living. Most of the trees died the first year, due to drought. Some burrs on trees last year & again this year
