

The 71st Report on FOOD PRODUCTS 1966

J. GORDON HANNA

Begining Tolerances Pests

BULLETIN OF THE CONNECTICUT AGRICULTURAL
EXPERIMENT STATION, NEW HAVEN • NO. 691, APRIL 1968

The 71st Report on

FOOD PRODUCTS
1966

J. Gordon Hanna

This report is a summary of the examinations of official samples of foods, drugs and cosmetics submitted by the Commissioner of Consumer Protection and the Commissioner of Agriculture during the calendar year of 1966.

The bulletin contains an alphabetical listing of Connecticut towns with dealers from which samples were collected grouped according to the various towns. The intent of this arrangement is to make information readily available to aid the consumer in judging the reliabilities of the dealers in his area.

In addition to the samples listed, the Commissioner of Agriculture submitted 395 official samples of the Connecticut milk supply for chlorinated pesticide residue analyses. Of this number, 2 samples contained dieldrin and 2 contained DDT, both pesticides in low but significant amounts.

Analyses for adulteration or for conformance to label claims were in many cases the bases for deciding whether or not samples were deficient. In other cases examinations of certain products for conformance to State and Federal definitions and standards of identity were used. Some of these latter requirements may be of interest relative to the interpretation of the data listed in this bulletin.

Frankforts and bologna are limited to not over 3.5 per cent fillers, 10 per cent water, and 200 parts per million sodium nitrite. Hamburg is required to contain not more than 30 per cent fat and pork sausage may not contain more than 50 per cent fat. The addition of sulfur dioxide to any meat product is not permitted.

Vitamin D milk is standardized to contain 400 USP units of vitamin D per quart. Vitamin mineral fortified milk is required to contain not less than the following quantities of vitamins: vitamin A, 4,000 and vitamin D, 400 USP units per quart; thiamine, 1; riboflavin, 2; and niacin, 10 milligrams per quart.

Federal regulations require jellies, jams, and other fruit preserves to contain not less than 45 parts of fruit to each 55 parts of added sugar; their soluble solids contents must not be less than 68% (65% in the case of jellies and apricot, peach, plum and a few other fruit jams.)

The work represented by this report was performed under the direction of H. J. Fisher until his retirement August 1, 1966 by Messrs. Botsford, Hankin and staff, Keirstead, Merwin, Squires, West, Wickroski, Miss Hornig and Mrs. McLean. The responsibility for obtaining samples and for taking any legal action resulting from the laboratory findings rested with Commissioner Gill of the Department of Agriculture and Commissioner Frassinelli of the Department of Consumer Protection.

PESTICIDE RESIDUES

Evaluations of the significance of the pesticide residues found in milk and other food and reported in this bulletin are based on official tolerance levels established by the Food and Drug Administration, U. S. Department of Health, Education and Welfare. In most cases these tolerance levels include a 100-fold safety factor based on the physiological effects on test animals.

Concern is often expressed if any pesticide residues at all are detected in food. It should be kept in mind that modern analytical instruments have capabilities to detect extremely minute amounts. In fact the units in which residue findings are expressed are so small as to make it difficult to form a meaningful concept. Residues in many cases are routinely detectable down to at least the 10 parts per billion level. This is roughly comparable to looking for one particular set of twins in the entire population of the United States.

AVON

✓ Thomas Burnham, W. Avon Rd.

FH-1054: String Beans

Chlorinated pesticides, none detected.

The House of Hasselbach, Route 44

AF-922: Chicken Candy Egg

Visual inspection, acceptable.

Deficiency noted: Container is an ordinary egg carton.

Petit's Food Mart, 195 W. Main St.

AF-959: Hi C Apple Drink

Invert sugar, 10.7 g./100 ml.; ash, 0.14 g./100 ml.; K₂CO₃ in ash, 74%; ascorbic acid, 44.6 mg./6 oz.; acidity as citric, 0.48 g./100 ml.; pH, 3.2.

BAL TIC

Sunrise Dairy

PG-5900: Homogenized Vitamin D Milk

Vitamin D, satisfactory.

BANTAM

Avalon Farms

✓ FH-1168: Peaches

Chlorinated pesticides, nothing significant.

BERLIN

Blue Ridge Farm, 1100 Chamberlain Highway

✓ FH-1089: Tomatoes

Chlorinated pesticides, nothing significant.

Ferndale Dairy

HW-4401, -4959, and -5301: Homogenized Vitamin D Milk

Vitamin D, satisfactory.

Food Mart, 139 Webster Square Rd.

AL-1462: Swans Down Cake Flour

Organoleptic tests, satisfactory.

AL-1464: Dining In Frozen Cheese Pizza

Appearance, partially baked and subject to a Connecticut bakery license.

HL-507: Food Club Orange Juice, Sugar Added
Juice, 89%; added sugar, 3%; added water, 8%.

HL-508: Food Club Orange Juice, Unsweetened
Juice, 86%; added sugar, 2%; added water, 12%.
Deficiency noted: Not unsweetened.

HL-564: Food Club Orange Juice, Unsweetened
Juice, 90%; total sugar, 9.26/100 ml.

HL-565: Juice 94%; total sugar, 9.53 g./100 ml.

HL-597: Juice 99%; total sugar, 9.15 g./100 ml.

KF-4314: Gourmet Egg Rolls

Water, 35.5%; whole egg solids, dry basis, 1.20%.

Deficiency noted: Low in egg content.

BERLIN (Cont.)

Food Mart (Cont.)

KF-4321: Gourmet Strawberry Flavored Popcorn
Added vegetable oil, none found; artificial color, present (declared); flavor, artificial.

Deficiency noted: Should be labeled, "Imitation Strawberry".

KF-4403: Home Pride Italian Sausage
Water, 48.7%; protein, 12.8%; fat, 31.2%; ascorbic acid, absent; sorbic acid, present.

Deficiency noted: Undeclared sorbic acid present.

KF-4404: Royal Dairy Orange Juice
Juice, 89%; benzoic and sorbic acids, absent; net contents, 32.2 fl. oz. (1 qt. claimed).

KF-4510: Gourmet Jewish Challah Egg Rolls
Water, 27.7%; whole egg solids, dry basis, 1.3%; coal tar dye, absent.

Deficiency noted: Low in egg content.

KF-4511: Gourmet Buttercrust Loaf Bread
Water, 28.3%; fat, 7.7%; butter in crust, 0.50%; butter in whole loaf, 0.13%.

Deficiency noted: "Buttercrust" name misleading.

KF-4559: Gourmet Black Pumpernickel
Label inspection, ingredient statement incomplete.
Deficiency noted: Label incomplete.

KF-4560: Gourmet Petite Egg Rolls
Water, 24.1%; whole egg solids, dry basis, 2.17%.
Deficiency noted: Low egg content.

KF-4561: Gourmet Czarnuszke Corn Rye Bread
Artificial color, absent.
Deficiency noted: Corn not listed among ingredients.

✓ Bruce Grant, Southington Rd.

FH-1088: Blueberries
Chlorinated pesticides, nothing significant.

✓ Hrubiec Orchards, 1489 Kensington Rd.

FH-1086: Blueberries
Chlorinated pesticides, nothing significant.

Johnson Dairy

HW-4402, -4960, and -5302: Homogenized Vitamin D Milk
Vitamin D, satisfactory.

Lower Lane Dairy

HW-4403, -4961, and -5303: Homogenized Vitamin D Milk
Vitamin D, satisfactory.

✓ John C. Maier, 213 Southington Rd.

FH-1087: Peppers
Chlorinated pesticides, nothing significant.

Rockland Dairy

HW-4312, -4962, and -5304: Homogenized Vitamin D Milk
Vitamin D, satisfactory.

BERLIN (Cont.)

Ventres Dairy

HW-4404, -4963, and -5305: Homogenized Vitamin D Milk
Vitamin D, satisfactory.

BETHANY

Ralph Musto & Son, Peck Rd.

✓ FH-1178: Tomatoes
Chlorinated pesticides, nothing significant.

Rosehurst Dairy

HW-5796: Homogenized Vitamin D Milk
Vitamin D, satisfactory.

BETHLEHEM

Matthew March, Munger Lane

✓ FH-1175: Green Squash
Chlorinated pesticides, nothing significant.

Parmelle Bros.

HW-4125 and -5251: Homogenized Vitamin D Milk
Vitamin D, satisfactory.

BLOOMFIELD

Connecticut Packing Co., Cottage Grove Rd.

AF-909 and -910: Jes-So Albacore White Tuna Flakes
Appearance, normal.

AF-911: Sweet Life White Tuna Chunks
Appearance, normal.

Maple Hill Farms

HW-4310 and -5257: Homogenized Vitamin D Milk
Vitamin D, satisfactory.

KN-7637: Orange Drink
Juice content, 10%.

KN-7637: Grape Drink
Juice content, 8%.

Chris Nielsen & Sons

HW-5258: Homogenized Vitamin D Milk
Vitamin D, satisfactory.

Talcott View Farm

HW-5259: Homogenized Vitamin D Milk
Vitamin D, satisfactory.

Wade's Fruits and Vegetable Farm, Simsbury Rd.

FH-1051: Cabbage
Chlorinated pesticides, nothing significant.

BOLTON

Michael Kury's Farm, RFD 1

✓ FH-941: Strawberries
FH-1200: McIntosh Apples
Chlorinated pesticides, nothing significant.

BOLTON (Cont.)

Robert Lodi, RFD 1

Chlorinated pesticides, nothing significant.

Morra Farm, RFD 1

FH-940: StrawberriesFH-1199: Pears

Chlorinated pesticides, nothing significant.

Frank Paggioli, RFD 1

FH-942: StrawberriesFH-1320: Cauliflower

Chlorinated pesticides, nothing significant.

Aldo Pesces, Hebron Rd.

FH-943: StrawberriesFH-1321: Cauliflower

Chlorinated pesticides, nothing significant.

Volpi Bros., RFD 1

FH-1198: McIntosh Apples

Chlorinated pesticides, nothing significant.

BRANFORD

Casmire Johnson, 175 Cherry Hill Rd.

FH-1143: Golden Jubilee Peaches

Chlorinated pesticides, nothing significant.

Lakso Farm, Leetes Island Rd.

FH-1144: Egg Plant

Chlorinated pesticides, nothing significant.

Saturno Farm, 127 Hosley Ave.

FH-864: Radishes

Chlorinated pesticides, nothing significant.

Shelly Garden Center, 545 Main St.

JB-780: Har Co Potatoes

Organoleptic tests on cooked and uncooked potatoes, normal.

Vaiuso Farm, 75 Hosley Ave.

FH-863: Radishes

Chlorinated pesticides, nothing significant.

BRIDGEPORT

Beechmont Dairy, Inc., 2710 North Ave.

FH-812: Cottage Cheese

Chlorinated pesticides, nothing significant.

WM-9548: Orangeade

Juice, 9%.

Deficiency noted: Low in juice content.

WR-9313: Homogenized Vitamin D Milk

Vitamin D, satisfactory.

Bridgeport Celery Co., 288 Stratford Ave.

FH-974: Yellow Squash

Chlorinated pesticides, nothing significant.

BRIDGEPORT (Cont.)

Dewhirst Dairy

WR-9314: Homogenized Vitamin D Milk

Vitamin D, satisfactory.

Diaz Grocery, 683 Pembroke St.

SG-577: Yams

Red artificial color, present.

Deficiency noted: Artificially colored.

First National Stores, Inc., 1-37 Whiting St.

KF-4655 and -4658: Wesson Polyunsaturated Vegetable Oil
Cottonseed oil, present; peanut and mineral oils, absent; BHA
and BHT, absent; butyro refraction at 25°C, 68.0.

KF-4656 and -4657: Same as above; butyro refraction, 67.0.

Frosinose Importing Co., 3939 Main St.

KF-4366: Armour FrankfurtersWater, 37.0%; protein, 16.0%; dextrose, 0.47%; starch, 0.0%;
dry skim milk, 0.0%; sodium nitrite, 58 p.p.m.KF-4367: Mrs. Martha Whyte's Sour Cauliflower

Sulfur dioxide, 90 p.p.m.; benzoic and sorbic acids, absent.

Deficiency noted: Undeclared sulfur dioxide present.

KF-4368: L&B Vacuum Packed Hot Banana PeppersTests for spice, filth, decomposition, and benzoic and sorbic
acids, negative.KF-4369: Mrs. Martha Whyte's Sweet Peppers

Spice, none detected; benzoic acid test, positive.

Deficiency noted: Undeclared benzoic acid present.

SG-550: Romi Cartwheels, LargeNet wt., average of 6 packages -- 1 lb., 14.9 oz. (2 lb.
claimed).

Deficiency noted: Short weight.

The Great Atlantic & Pacific Tea Co., Boston Ave.

SG-500: Topp's Pro-Football Bubble Gum

Fill of container, 29%.

Deficiency noted: Misleading fill of container.

The Great Atlantic & Pacific Tea Co., Inc., Main St.

SG-506: Beechnut Vegetables and Lamb Baby FoodSG-507: Gerber Strained Beef with Vegetables

Appearance, normal.

Guadalupe Tropical Products, 448 E. Main St.

KF-4400: Stahl-Meyer FrankfurtersWater, 54.8%; protein, 11.5%; dextrose, 0.25%; starch, 0.0%;
dry skim milk, 0.0%; added water, 9.8%; sodium nitrite, 8
p.p.m.

Herman Importing Co., 30 Grove St.

SG-491: Raffetto Mint Leaves JellyFruit juice, 6% as apple; ratio fruit to added sugar, 6.3/55
(45/55 required).

Deficiency noted: Imitation jelly not so labeled.

BRIDGEPORT (Cont.)

King Cole, 1700 Park Ave.

KF-4355: Rich's Non-Dairy Coffee Rich

Protein, 0.82% (0.80 claimed); dextrose, 4.24% (4.76 claimed); fat, 12.0% (12 claimed); calories, 161/100 g. (160 claimed); sodium, 136 mg./100 g. (100 claimed); potassium, 4.8 mg. per 100 g.

KF-4356: Coffee An', Non-Dairy Coffee Lightener

Protein, 1.07%; dextrose, 5.24%; fat, 12.2%; calories, 158 per 100 g.; sodium, 135 mg./100 g.; potassium, 4.5 mg. per 100 g.

SG-551: Fiddlesticks Candy

Iodine no. 10.11; saponification no. 241; Reichert-Meissl no. 4.72; Polenske no. 9.23; butyro refraction, 37.0 (40°C).

Deficiencies noted: Sample contains either coconut or palm kernel fat, and very little, if any, chocolate as claimed.

SG-552: Antonioli Italian Macaroni

Coal tar dye, absent; odor, slight carrot and spinach.

Deficiency noted: Undeclared spinach and carrots present as coloring.

SG-576: Mueller's Macaroni Sea Shells

Visual inspection, insect infestation noted.

Deficiency noted: Insect infestation.

Liscio's Market, Broadbridge Rd.

SG-489: Italian Sausage

Organoleptic tests, normal.

Lis Super Market, 647 Pembroke St.

KF-4533: Santa Clara Pear Nectar

Juice, 41%; benzoic acid, absent; sorbic acid, present.

KF-4534: Juice, 47%; benzoic acid, absent; sorbic acid, present.

Deficiency noted: Contains undeclared sorbic acid.

KF-4688: G. C. Romano Cheese

Moisture, 12.8% (34% max. permitted); lactose, 0.0%; fat, dry basis, 36.8% (38 min. required).

Deficiency noted: Low in fat.

SG-533: Santa Clara Peach NectarSG-535: Santa Clara Apricot NectarSG-537: Santa Clara Pear Nectar

Benzoic acid, absent; sorbic acid, present.

Deficiency noted: Contains undeclared sorbic acid.

Mohican Market, 58 Fairfield Ave.

FM-1493: IGA Grape Drink

Juice, 8%.

Nutmeg Bakers Supply Co., Colonial Ave.

KF-4732: Apricot Coating

Water, 50%; artificial color, absent; sodium benzoate, present; net wt. -- 7 lb., 12 oz. (7 lb., 8 oz. claimed).

Deficiency noted: Undeclared benzoate present.

BRIDGEPORT (Cont.)

Nutmeg (Cont.)

KF-4733: Egg Shade Color

Dyes found: Yellow No. 5 and Yellow No. 6.

Deficiency noted: Net weight undeclared.

KF-4734: Special Sprinklettes, Candy

Artificial color, Red No. 2 and Yellow No. 6, present.

Deficiency noted: Undeclared coal tar dyes present.

R & R Retail Grocers Outlet, 58 Fairfield Ave.

Chlorinated pesticides, nothing significant.

BROOKFIELD

Shopwell, Route 7

KF-4270: Mr. Bagel Dinner Rolls

Water, 26.5%; protein, 12.8%; fiber, 0.43%; available carbohydrate, 58.4%; fat, 0.77%; calories/roll, 88.3; artificial color, none detected.

Deficiencies noted: Not low in calories as claimed; label incomplete for a special dietary food.

KF-4638: Roessler's Yellow Tag Hurki

Water, 58.4%; protein, 12.4%; dextrose, 0.27%; starch, 5.27%; dry skim milk, 1.65%; sodium nitrite, trace.

Deficiencies noted: Undeclared dry skim milk, nitrite, and dextrose or corn syrup present.

KF-4639: Shopwell Wine Vinegar

Ash, 0.114 g./100 ml.; solids, 0.67 g./100 ml.; acidity as acetic, 5.25%; tartaric acid, 0.026 g./100 ml.; coal-tar dye, absent.

KF-4640: Gioia So-Hot Cherry Peppers

Butyro refraction at 25°C, 70.4 (largely oil); capacity of jar, 8.1 fl. oz. (8 fl. oz. claimed); sorbic acid and alum, absent; benzoic acid, present.

Deficiency noted: Undeclared benzoic acid present.

KF-4641: Gioia Imported Peppersoncini

Benzoic and sorbic acids, not detected; visual examination, cellulose fibers, and material resembling wax noted.

Deficiency noted: Foreign material present.

KF-4642: Schweppe's Bitter Lemon

Sodium benzoate, 0.01 g./100 ml. (1/10 of 1% claimed); microscopic examination, pulp-like material present.

KF-4665: Bulk Potato Salad

KF-4666: Potato Salad German Style, Bulk

Tests for benzoic acid, sorbic acid, sodium sulfite, negative.

KF-4667: Bulk Cole Slaw

Tests for starch, ascorbic acid, benzoic acid and sorbic acid, negative.

KF-4668: Bulk Garden Salad

Tests for benzoic, sorbic and ascorbic acids, negative.

KF-4669: Bulk Macaroni Salad

Tests for benzoic and sorbic acids, negative.

BROOKLYN

Kingswood Dairy

PR-2020: Green Spot Orange Drink

Juice, 7%.

Deficiency noted: Low in juice content.

PR-2389: Green Spot Orange Drink

Juice, 9%.

CANTERBURY

✓ Charles Grab, Benett Pond Rd.

FH-1253: Brussel Sprouts

Chlorinated pesticides, nothing significant.
