

# The Connecticut Agricultural Experiment Station.

NEW HAVEN, CONN.

---

## BULLETIN No. 92.

SEPTEMBER, 1887.

---

The following Bulletin contains a list of all those fertilizers on which an analysis fee has been paid during the present year, as required by law. It also contains analyses and valuations of all the ammoniated superphosphates, guanos, and special fertilizers which have been sampled by agents of the Station since January of this year from stock in the hands of retail dealers in Connecticut.

The retail cash price of the same fertilizer as quoted by different dealers varies in some cases considerably, partly on account of differences in freight-rates, presence or absence of competition, etc. With the various *dealers'* quotations is also given for comparison the *manufacturers'* statement of the average retail cash price per ton in the State. The cash prices are usually about five per cent. lower than the credit or "time" prices.

The last column of the table of analysis is "Percentage Difference between Cost and Valuation." Its significance and the method of calculating it may be seen by noticing the fourth analysis in the table on page 13, No. 2046. Here the cost is \$28, the valuation is \$26.65, and the difference between them is \$1.35. By multiplying this difference, \$1.35, by 100, and dividing it by the

valuation, \$26.65, we get the percentage advance of selling price over valuation, which advance should represent the costs and profits of the manufacturer in converting the raw materials into a mixed fertilizer, selling it and collecting on his sales.

No. 2119 is an average of three closely agreeing analyses of Victor Phosphate. This is a brand made for the Apothecaries Hall Co., Waterbury, by a fertilizer company outside the State. The analyses proved that the goods were not what the Apothecaries Hall Co. had guaranteed or ordered, and for that reason the price is less than it was in 1886.

### OBSERVANCE OF THE FERTILIZER LAW.

MANUFACTURERS who have paid Analysis Fees as required by the Fertilizer Law, and Fertilizers for which the Fees have been paid for the year ending May, 1888.

<i>Firm.</i>	<i>Brand of Fertilizer.</i>
