Connecticut Siting Council  
Ten Franklin Square  
New Britain, CT. 06051

Docket 192B

### **Proposed additional Findings of Fact**

Dear Chairman Stein and Council Members:

The current draft Findings of Fact make no reference to the current Town of Oxford 2007 Plan of Conservation and Development. This plan has been referenced in briefs and I believe testimony and should be an integral part of this hearing. This plan is on the town website. It cannot be simply left out. The council received a complete copy of this document on April 20, 2015 submitted as a written statement from Robert J. Clark. In reaching your final decision you cannot and should not ignore this document.

Proposed additional Findings of Fact:

The 1999 approved plant and the new proposed plant as they relate to rural character, type of industry, hilltop location, height of facility, and visibility of the facility are inconsistent with the current Town of Oxford 2007 Plan of Conservation and Development. (TOPCD IV-1, XII-1, IV-11, V-4, IV-9, XII-7, IX-6, IX-11)

I again recognize the difficulty that the Connecticut Siting Council faces in deciding this matter, and thank you for your services.

Sincerely,

Wayne McCormack
