## EXECUTIVE SUMMARY

Cellco Partnership d/b/a Verizon Wireless (“Cellco”) proposes to construct a telecommunications tower and related facility (the “Huntington Facility”) on an approximately 99-acre parcel owned by the Harry B. Brownson Country Club, a portion of which is located off Lane Street in Shelton, Connecticut (the “Property”). The Huntington Facility will provide coverage and capacity relief along portions of Route 108, as well as local roads in the central portion of the City of Shelton.

Cellco proposes the construction of a 120-foot telecommunications tower disguised as a pine tree at the Property. Simulated branches will extend an additional seven (7) feet above the top of the tower. Cellco will install fifteen (15) panel-type antennas, with their centerline at the 120-foot level on the tower. Cellco would also install a 12' x 30' shelter located near the base of the tower to house its radio equipment and a back-up generator. The tower and equipment shelter will be located within a 40' x 66' fenced compound. Vehicular access to the Huntington Facility would extend from Lane Street a distance of approximately 1,680 feet. Utilities will extend from existing service along Lane Street.

**APPLICATION FOR CERTIFICATE OF  
ENVIRONMENTAL COMPATIBILITY AND PUBLIC NEED**

**I. INTRODUCTION**

**A. Authority and Purpose**

This Application and the accompanying attachments (collectively, the “Application”) is submitted by Cellco Partnership d/b/a Verizon Wireless (“Cellco” or the “Applicant”), pursuant to Chapter 277a, Sections 16-50g et seq. of the Connecticut General Statutes (“C.G.S.”), as amended, and Sections 16-50j-1 et seq. of the Regulations of Connecticut State Agencies (“R.C.S.A.”), as amended. The Application requests that the Connecticut Siting Council (“Council”) issue a Certificate of Environmental Compatibility and Public Need (“Certificate”) for the construction, maintenance, and operation of a wireless telecommunications facility, in the Huntington section of the City of Shelton (“City”), Connecticut. Cellco refers to this proposed cell site as its “Huntington Facility”. The proposed Huntington Facility would provide wireless telecommunications coverage and capacity relief along portions of Route 108, as well as local

roads in the Huntington area. Cellco currently experiences coverage gaps and capacity problems at cellular and PCS frequencies between its existing Shelton, Shelton North and Trumbull cell sites. Cellco’s Shelton cell site consists of antennas at the 150-foot level of a 190-foot tower off Buddington Road in Shelton, approximately 1.25 miles east of the Huntington Facility. Cellco’s Shelton North cell site consists of antennas at the 98-foot level of a 120-foot tower at 161 Birdseye Road in Shelton, approximately 2.3 miles north of the Huntington Facility. Cellco’s Trumbull cell site consists of antennas at the 232 and 238-foot levels of a 486-foot tower at Video Lane in Trumbull approximately 3.0 miles southwest of the Huntington Facility. The proposed Huntington Facility will provide reliable wireless service to a 2.16 mile portion of Route 108 and an overall area of 6.9 square miles at cellular frequencies and a 2.08 mile portion of Route 108 and an overall area of 3.8 square miles at PCS frequencies.

The Huntington Facility would be located in the southerly portion of the Brownson Country Club property, north of Lane Street in Huntington (the “Property”). The Property is located in the R-1 Residence zone district.<sup>1</sup>

If this application is approved by the Council, Cellco will construct a 120-foot self-supporting monopole telecommunications tower, disguised as a pine tree, at the Property. Cellco would install fifteen (15) panel-type antennas (six (6) cellular antennas; six (6) PCS antennas and three (3) 700 MHz antennas) with their centerline at the 120-foot level. Simulated branches would extend an additional 7’ above the top of the tower. Equipment associated with Cellco’s antennas would be located in a 12’ x 30’ shelter installed near the base of the tower within a 40’ x 66’ fenced compound. Vehicular access to the Huntington Facility would extend from Lane

---

<sup>1</sup> The Brownson Country Club property consists of two separate parcels, one north of Route 108 and east of Soundview Avenue and one south of Route 108 and north of Lane Street. Both parcels together total 99 acres.

Street a distance of approximately 1,680 feet. Portions of the new driveway extension will follow existing cart paths on the Property. Utilities will extend underground from existing service along Lane Street.

Both the tower and leased area would be designed to accommodate additional carriers as well as municipal and emergency services antennas and equipment. As of the date of this filing neither the City nor any other wireless carrier has committed to share the proposed tower.

Cellco's equipment shelter would house radio and related equipment, including (a) receiving, transmitting, switching, processing and performance monitoring equipment; and (b) automatic heating and cooling equipment. A back-up generator would also be installed in a segregated generator room within the shelter for use during power outages and periodically for maintenance purposes.

The tower and equipment shelter would be enclosed by an 8-foot high security fence and gate. Cellco's equipment building would be equipped with a silent intrusion and systems alarm and will be monitored on a 24-hour basis to receive and to respond to incoming alarms or other technical problems. The equipment building would remain unstaffed, except as required for maintenance. Once the cell site is operational, maintenance personnel will visit the cell site on a monthly basis. More frequent visits may be required if there are problems with the cell site equipment.

Included in this Application as Attachment 1 is a factual summary and project plans for the proposed Huntington Facility. This summary, along with the other attachments submitted as part of this Application, contains all of the site-specific information required by statute and the regulations of the Council.

In accordance with Paragraph I(F) of the Council's "Application Guide" for Community Antenna Television and Telecommunication Towers, a copy of the Application Guide is included as Attachment 2. The Application Guide contains references to the specific pages of this Application and the attachments where the information required under Section VI of the Application Guide may be found.

**B. The Applicant**

Cellco is a Delaware Partnership with an administrative office located at 99 East River Drive, East Hartford, CT, 06108. Cellco is licensed by the Federal Communications Commission ("FCC") to operate a wireless telecommunications system in the State of Connecticut within the meaning of C.G.S. Section 16-50i(a)(6). Operation of the wireless telecommunications systems and related activities are Cellco's sole business in the State of Connecticut.

Cellco has extensive national experience in the development, construction and operation of wireless telecommunications systems and the provision of wireless telecommunications service to the public.

Correspondence and/or communications regarding this Application may be addressed to:

Sandy Carter, Regulatory Manager  
Verizon Wireless  
99 East River Drive  
East Hartford, Connecticut 06108

A copy of all such correspondence or communications should also be sent to the applicant's attorneys:

Robinson & Cole LLP  
280 Trumbull Street  
Hartford, Connecticut 06103-3597  
(860) 275-8200  
Attention: Kenneth C. Baldwin, Esq.

**C. Application Fee**

The estimated total construction cost for the Huntington Facility would be less than \$5,000,000. Therefore, pursuant to Section 16-50v-1a(b) of the Regulations of Connecticut State Agencies, an application fee of \$1,000 accompanies this Application in the form of a check payable to the Council.

**II. SERVICE AND NOTICE REQUIRED BY C.G.S. SECTION 16-50I(b)**

Copies of this Application have been sent by certified mail, return receipt requested, to municipal, regional, state and federal officials, pursuant to C.G.S. Section 16-50I(b). A certificate of service, along with a list of the parties served with a copy of the Application, is included as Attachment 3.

Notice of Cellco's intent to submit this Application was published on July 9 and 10, 2009, by Cellco in the *Connecticut Post* pursuant to C.G.S. Section 16-50I(b). A copy of the published legal notice is included as Attachment 4. A copy of the publisher's affidavit or certificate of publication will be submitted to the Council as soon as it is available.

Attachment 5 contains a certification that notices were sent to each person appearing of record as an owner of property that may be considered to abut the Property in accordance with C.G.S. Section 16-50I(b), as well as a list of the property owners to whom such notice was sent and a sample notice letter.

**III. REQUIRED INFORMATION: PROPOSED WIRELESS FACILITY**

The purpose of this section is to provide an overview and general description of the wireless facility proposed to be installed at the Property.

**A. General Information**

Prior to the 1980's, mobile telephone service was characterized by insufficient frequency availability, inefficient use of available frequencies and poor quality of service. These limitations generally resulted in problems of congestion, blocking of transmissions, interference, lack of coverage and relatively high cost. Consequently, the FCC, in its Report and Order released May 4, 1981 in FCC Docket No. 79-318, recognized the public need for technical improvement, wide-area coverage, high quality service and a degree of competition in mobile telephone service.

More recently, the federal Telecommunications Act of 1996 (the "Act") emphasized and expanded on these aspects of the FCC's 1981 decision. Among other things, the Act recognized an important nationwide public need for high-quality wireless telecommunication services of all varieties. The Act also expressly promotes competition and seeks to reduce regulation in all aspects of the telecommunications industry in order to foster lower prices for consumers and to encourage the rapid deployment of new telecommunications technologies.

Cellco's proposed Huntington Facility would be part of the expanding wireless telecommunications network envisioned by the Act and has been developed to help meet these nationwide goals. In particular, Cellco's system has been designed, and the cell sites proposed in this Application have been selected, so as to maximize the geographical coverage and quality of service while minimizing the total number of cell sites required.

Because the FCC and the United States Congress have determined that there is a pressing public need for high-quality wireless telecommunications service nationwide, the federal government has preempted the determination of public need by states and municipalities, including the Council, with respect to public need for the service to be provided by the proposed facility. In

addition, the FCC has promulgated regulations containing technical standards for wireless systems, including design standards, in order to ensure the technical integrity of each system and nationwide compatibility among all systems. State and local regulation of these matters is likewise preempted. The FCC has also exercised its jurisdiction over and preempted state and local regulation with respect to radio frequency interference issues by establishing regulations in this area as well.

Pursuant to FCC authorizations, Cellco has constructed and currently operates a wireless system throughout Connecticut. This system, together with Cellco's system throughout its east coast and nationwide markets, has been designed and constructed to operate as one integrated, contiguous system, consistent with Cellco's business policy of developing compatibility and continuity of service on a regional and national basis.

Recognizing the public safety benefits that enhanced wireless telecommunications networks can provide, the United States, Congress also enacted the Wireless Communications and Public Safety Act of 1999 to promote and enhance public safety by making 911 the universal emergency assistance number, furthering the deployment of wireless 911 capabilities and further encouraging the construction and operation of seamless, ubiquitous and reliable wireless networks. In 2004, Congress enacted the Enhanced 911 Act for the specific purpose of enhancing and promoting Homeland Security, public safety and citizen activated emergency response capabilities. These goals and other related responsibilities imposed on wireless service providers can only be satisfied if Cellco maintains a ubiquitous and reliable wireless network.

Included as Attachment 6 is a copy of the FCC's authorization issued to Cellco for its wireless service in Fairfield County, Connecticut. The FCC's rules permit a licensee to modify its system, including the addition of new cell sites, without prior approval by the FCC, as long as the

licensee's authorized service area is not enlarged. The Huntington Facility would not enlarge Cellco's authorized service area.

**B. Public Need and System Design**

**1. Public Need**

As noted above, the Act has pre-empted any state or local determination of public need for wireless services. In Fairfield County, Cellco holds FCC Licenses to provide cellular, PCS and 700 MHz wireless services.<sup>2</sup> Pursuant to its FCC Licenses, Cellco has developed and continues to develop a network of cell sites to serve the demand for wireless service in the area. Cellco's network currently provides coverage in Huntington and the surrounding areas from its existing cell sites in the area. Plots showing coverage from Cellco's existing Shelton, Shelton North and Trumbull facilities alone and together with the coverage from the proposed Huntington Facility are included as Attachment 7.

**2. System Design and Equipment**

**a. System Design**

Cellco's wireless system in general and the proposed Huntington Facility, in particular, have been designed and developed to allow Cellco to achieve and to maintain high quality, reliable wireless service without interruption from dropped calls and interference.

The system design provides for frequency reuse and hand-off, is capable of orderly expansion and is compatible with other wireless systems. The resulting quality of service compares

---

<sup>2</sup> As discussed in prior dockets, Cellco recently acquired FCC licenses to operate wireless services in the 700 MHz frequency band. In June 2009, Cellco installed, and now operates a "test cluster" of 700 MHz frequency band cell sites in Boston, Massachusetts. Cellco has announced publicly that commercial operation of its 700 MHz service will be commercially available, in certain markets, beginning in 2010. Cellco expects to begin commercial operation of its 700 MHz service in Connecticut in 2011.

favorably with the quality of service provided by conventional wireline telephone service. The wireless system is designed to assure a true cellular configuration of base transmitters and receivers in order to cover the proposed service area effectively while providing the highest quality of service possible. Cell site transmissions are carefully tailored to the FCC's technical standards with respect to coverage and interference and to minimize the amount of power that is radiated.

Mobile telephone switching offices ("MTSOs") in Windsor and Wallingford are interconnected and operate Cellco's wireless systems in Connecticut as a single network, offering the subscriber uninterrupted use of the system while traveling throughout the State. This network is further interconnected with the local exchange company ("LEC") and inter-lata (long distance) carriers network.

Cellco has designed its wireless system in conformity with applicable standards and constraints for wireless systems. Cellco's system is also designed to minimize the need for additional cell sites in the absence of additional demand or unforeseen circumstances.

**b. Cellular System Equipment**

The key elements of the cellular system are the two MTSOs located in Windsor and Wallingford and the various connector cell sites around the state. Cellco's CDMA wireless networks are deployed on two platforms: the earlier AUTOPLEX system, using Series II base stations, and the newer FLEXENT CDMA system, using smaller, more compact modular base stations. Because the Series II base stations are no longer manufactured, the newer CDMA systems, using smaller, more compact modular base stations are used for all current installations.

The major electronic components of each cell site are radio frequency transmission and receiving equipment and cell site controller equipment. Cellco's cellular system uses Lucent

Flexent® Modular Cell 4.0B cell site equipment to provide complete cell site control and performance monitoring. This equipment is capable of expanding in modules to meet system growth needs. The cell site equipment primarily provides for: message control on the calling channel; call setup and supervision; radio frequency equipment control; internal diagnostics; response to remote and local test commands; data from the mobile or portable unit in both directions and on all channels; scan receiver control; transmission of power control commands; rescanning of all timing; and commands and voice channel assignment. Additional information with respect to the Lucent Flexent® Modular Cell 4.0B equipment is contained in Attachment 8.

### **3. Technological Alternatives**

Cellco submits that there are no equally effective technological alternatives to the proposal contained herein. In fact, Cellco's wireless system represents state-of-the-art technology offering high-quality service. Cellco is aware of no viable and currently available alternatives to its system design for carriers licensed by the FCC.

#### **C. Site Selection and Tower Sharing**

##### **1. Cell Site Selection**

Cellco's goal in selecting cell sites such as the one proposed here is to locate its facility in such a manner as to allow it to build and to operate a high-quality wireless system with the least environmental impact. Cellco has determined that the proposed Huntington Facility will satisfy this goal and is necessary to resolve existing coverage problems and to provide high-quality reliable service along portions of Route 108, as well as local roads in the area.

The methodology of cell site selection for Cellco's wireless system generally limits the search for possible locations to specific locations on the overall grid for the area. A list of existing towers or other non-tower structures considered is included in Attachment 9. Cellco currently

shares each of the existing towers in the area including those sites identified on the coverage maps. (See Attachment 7). These existing tower sites cannot satisfy the coverage objectives for the Huntington search area. Cellco also regularly investigates the use of existing, non-tower structures in an area, when available, as an alternative to building a new tower. No existing non-tower structures of suitable height exist in the Huntington area. The site search summary, together with the site information contained in Attachment 1, support Cellco's position that the site selected represents the most feasible alternative of the sites investigated.

## **2. Tower Sharing**

Cellco will design its Huntington Facility and compound area so that it could be shared by a minimum of four wireless carriers and the City, if a need exists. This type of tower sharing arrangement would reduce, if not eliminate, the need for these other carriers or municipal entities to develop a separate tower in this same area in the future. As of the date of this filing, no other carrier has expressed any interest in the Huntington Facility.

### **D. Cell Site Information**

#### **1. Site Facilities**

At the Huntington Facility, Cellco would construct a 120-foot tall tree tower and install fifteen (15) panel-type directional antennas at the top of the tower. Cellco would also install a 12' x 30' single-story shelter near the base of the tower to house Cellco's receiving, transmitting, switching, processing and performance monitoring equipment and the required heating and cooling equipment. A diesel-fueled generator would be installed within a segregated room in Cellco's equipment shelter for use during power outages and periodically for maintenance purposes. The tower and equipment shelter would be surrounded by an 8-foot high security fence and gate. (See Attachment 1).

The equipment shelter would be equipped with silent intrusion and systems alarms. Cellco personnel will be available on a 24-hour basis to receive and to respond to incoming alarms. The equipment building will remain unstaffed, except as required for periodic maintenance purposes.

## 2. Overall Costs and Benefits

Aside from the limited visual impacts discussed further below, Cellco believes that there are no significant costs attendant to the construction, maintenance, and operation of the proposed cell site. In fact, the public will benefit substantially from its increased ability to receive high-quality, reliable wireless service in Huntington.<sup>3</sup> The Huntington Facility would be a part of a communications system that addresses the public need identified by the FCC and the United States Congress for high-quality, competitive mobile and portable wireless service. Moreover, the proposed cell site would be part of a system designed to limit the need for additional cell sites in the future.

The overall costs to Cellco for development of the proposed cell site are set forth in Section III.E. of the Application.

## 3. Environmental Compatibility

Pursuant to Section 16-50p of the General Statutes, in its review of the Application, the Council is required to find and to determine, among other things, the nature of the probable environmental impact, including a specification of every significant adverse effect of the Huntington Facility, whether alone or cumulatively with other effects, on, and conflicting with the

---

<sup>3</sup> Businesses across the State have become more dependent on wireless telecommunication services. The public safety benefits of wireless telephone service are illustrated by the Connecticut State Police enhanced 911 ("E-911") emergency calling system. The E-911 emergency calling system is available statewide to all wireless telephone users. Numerous other emergency service organizations have turned to wireless telephone service for use during natural disasters and severe storms when wireline service is interrupted or unavailable. As a deterrent to crime, the general public will further benefit from the Cellular Telecommunications Industry Association's donation of cellular phones to "Neighborhood Watch" groups nationwide.

policies of the state concerning the natural environment, ecological balance, public health and safety, scenic, historic and recreational values, forests and parks, air and water purity and fish and wildlife.

**a. Primary Facility Impact is Visual**

The wireless system of which the proposed Huntington Facility would be a part has been designed to meet the public need for high-quality, reliable wireless service while minimizing any potential adverse environmental impact. In part because there are few, if any other adverse impacts, the primary impact of facilities such as this is visual. This visual impact will vary from location to location around a tower, depending upon factors such as vegetation, topography, the distance of nearby properties from the tower and the location of buildings and roadways in a “sight line” toward the tower. Similarly, visual impact of a tower facility can be further reduced through the proper use of alternative tower structures; so-called “stealth installations.” Where appropriate, telecommunications towers camouflaged as trees, can help to further reduce visual impacts associated with these structures. Attachment 10 contains a detailed Visual Resource Evaluation Report, prepared by VHB, Inc. (the “VHB Report”) that assesses the visual impact of the proposed tower and includes photosimulations of the tower at this site for the Council’s consideration. According to the VHB Report, areas where the tower would be visible above the tree canopy comprise approximately seventeen (17) acres or less than one-half of one percent of the 8,042 acre study area. The areas of year-round visibility associated with the Huntington Facility is generally limited to the Property and the immediate vicinity of the Property, including portions of ten residential properties. Areas where seasonal views are anticipated comprise of approximately

twenty-nine (29) additional acres and are generally located in select portions of adjacent residential areas to the north and south of the Huntington Facility.

There are eleven (11) single family residences and forty eight (48) condominium units within 1,000 feet of the Huntington Facility. The closest residence is located at 68 Lane Street, approximately 360 feet to the south of the tower location. This property is listed on Cellco's abutting properties list behind Attachment 5 of this Application.

Weather permitting, Cellco will raise a balloon with a diameter of at least three (3) feet at the proposed cell site on the day of the Council's hearing on this Application, or at a time otherwise specified by the Council.

**b. Environmental Reviews and Agency Comments**

Section 16-50j of the General Statutes requires the Council to consult with and to solicit comments on the Application from the Commissioners of the Departments of Environmental Protection, Public Health, Public Utility Control, Economic Development, and Transportation, the Council on Environmental Quality, and the Office of Policy and Management, Energy Division. In addition to the Council's solicitation of comments, Cellco, as a part of its National Environmental Policy Act ("NEPA") Checklist, solicits comments on the proposed facility from the U.S. Department of the Interior, Fish and Wildlife Service ("USFWS"), Environmental and Geographic Information Center of the Connecticut Department of Environmental Protection ("DEP") and the Connecticut Historical Commission, State Historic Preservation Officer ("SHPO"). Information on the USFWS and DEP reviews regarding impacts on known populations of Federal or State Endangered, Threatened or Special Concern Species occurring at the proposed site are included in Attachment 11. According to the USFWS letter dated January 2, 2009 and a confirming

memorandum from Dean Gustafson at VHB, Inc. dated February 17, 2009, no federally-listed or proposed, threatened or endangered species or critical habitat are known to occur in Shelton, Connecticut (Fairfield County). The development of the Huntington Facility, therefore, will not have an adverse effect to any federally listed, endangered or threatened species.

In an October 16, 2008 letter, the DEP also confirmed that there are no known extant populations of Federal or State Endangered, Threatened or Special Concern species that occur at the Property. A copy of the USFWS information and Mr. Gustafson's February 17, 2009 memorandum and the DEP's October 16, 2008 letter are included as a part of Attachment 11.

Also included in Attachment 11 is a letter from the SHPO confirming that the Huntington Facility will have no adverse effect on cultural resources listed or eligible for listing on the National Register of Historic Places.

This review by federal and state agencies furnishes ample expert opinion on the potential environmental impacts from the Huntington Facility, in the context of the criteria which the Council must consider.

**c. Non-Ionizing Radio Frequency Radiation**

The FCC has adopted a standard for exposure to Radio Frequency ("RF") emissions from telecommunications facilities like the one proposed in this Application. To ensure compliance with the applicable standards, Cellco has performed maximum power density calculations for the proposed cell site according to the methodology prescribed by the FCC Office of Engineering and Technology Bulletin No. 65E, Edition 97-01 (August 1997) ("OET Bulletin 65"). The calculation is a conservative, worst-case approximation for RF power density levels at the closest accessible point to the antennas, in this case the base of the tower, and with all antennas transmitting

simultaneously on all channels at full power. The calculations indicate that the maximum power density level for Cellco's cellular and PCS antennas would be 26.77% of the Standard at the Huntington Facility.

**d. Other Environmental Issues**

No sanitary facilities are required for the Huntington Facility. The operations at the Huntington Facility will not cause any significant air, water, noise or other environmental impacts, or hazard to human health.

Based on agency comments received and field investigations by Cellco's project team, Cellco submits that the proposed facility will have no significant adverse effect on scenic, natural, historic or recreational features, and that none of the potential effects from the Huntington Facility alone or cumulatively with other effects is sufficient reason to deny this Application.

**4. Consistency with Local Land Use Controls**

The Council Application Guide for Community Antenna Television and Telecommunication Facilities, as amended on February 16, 2007, requires the inclusion of a narrative summary of the project's consistency with the City's Plan of Development and Zoning Regulations, as well as a description of planned and existing uses of the site location and surrounding properties.

**a. Planned and Existing Land Uses**

The proposed Huntington Facility would be located in the southerly portion of an approximately 99-acre parcel owned by Harry B. Brownson Country Club. The Property is zoned R-1 Residence and used for private recreational purposes, a golf course. The Property is surrounded by wooded areas, a cemetery and single family and multi-family residential land uses.

**b. Shelton Plan of Conservation and Development**

The City of Shelton 2006 Plan of Conservation & Development (the “Plan”) dated July 31, 2006, recognizes the need and the benefits of maintaining high quality wireless telecommunications services in Shelton. The Plan recognizes that number portability and enhanced 911 services will likely “spur significant growth in wireless service”. To meet this demand, “new towers and antennae will be needed to fill existing gaps in coverage and handle additional call density in established areas.” (See Plan pp. 5-40 – 5-42). The Plan was filed as a Bulk File Exhibit on July 15, 2009.

**c. Zoning Regulations**

According to the Shelton Zoning Map, the Property is located in the R-1 Residential zone district. Pursuant to Section 48 of the Shelton Zoning Regulations, Wireless Communications Facilities are permitted in the R-1 zone subject to the approval of a Special Exception.

Section 48.6 of the Zoning Regulations requires all cell site towers, antenna and other wireless communications facilities to conform to the following standards.

48.6.1 Fencing. Consistent with this requirement, Cellco’s Huntington Facility compound will be surrounded by an 8-foot tall fence with privacy slats. The security fence is setback approximately 165 feet from the nearest property line, well in excess of the maximum building setback requirement of 40 feet in the R-1 zone. Although prohibited by Section 48.6.1 of the Zoning Regulations, Cellco does plan to install barbed wire at the top of the fence for security purposes.

48.6.2 Landscaping. The Huntington Facility compound will take advantage of the substantial existing vegetation surrounding the compound to mitigate adverse aesthetic impacts and soften the appearance of a cell site, fencing and related

buildings. Cellco will also install privacy slats in the fence and, if deemed necessary, supplemental landscaping around the base of the tower to further reduce the potential for visual impacts.

48.6.3 Illumination. No lighting of the proposed Huntington Facility tower is required or proposed.

48.6.4 Signage. Cellco does not intend to install any commercial advertising on the Huntington Facility tower.

48.6.5 Antenna Height. Cellco's antennas are proposed to be mounted at the 120-foot level on the tower. This height is the minimum necessary for Cellco to satisfy its coverage objectives in the area. At 120' (127' to the top of simulated tree branches) the proposed Huntington Facility tower exceeds the 100-foot maximum height for towers in residential zone districts. Cellco also intends to make this tower available for sharing by other carriers.

48.6.6 Setbacks. The Huntington Facility tower and all ground-mounted equipment shelters will meet the setback requirements for principle buildings in the R-1 zone. The compound fence maintains a setback of approximately 165 feet from the nearest property line to the west of the compound. The tower itself is setback approximately 185 feet from the nearest adjacent property line to the southwest.

48.6.7 Joint Use Accommodation. The proposed tower will be designed and constructed to accommodate multiple carriers.

48.6.8 Color. The tower and antennas will be designed and painted in accordance with the tree tower design.

48.6.9 All plans, design drawing and construction documents will be developed in accordance with the appropriate provisions of the Connecticut State Building Code.

**d. Inland Wetland and Water Course Regulations**

The Inland Wetlands and Watercourses Regulations of the City of Shelton (the “IWW Regulations”) define Regulated Activity as any operation within, or use of, a wetland or watercourse or deposition of material or any obstruction, construction, alteration or pollution, of such wetlands or watercourses. In addition, the IWW Regulations require a minimum setback of 50 feet from any watercourse. Additional setbacks have also been established from certain watercourses as set forth in Appendix A3. None of the watercourses described in Appendix A3 exist on the Property.

Dean Gustafson, Professional Soil Scientist with VHB, Inc., conducted a field investigation and completed a Wetlands Delineation Report and Wetland Impact Analysis for development of the Huntington Facility. Two small disturbed wetland areas (Wetlands 1 and 2) are located near the proposed Huntington Facility compound and a disturbed wetland (Wetland 3) and two irrigation ponds (Wetland 4) are located near the proposed access drive that generally follows an existing gravel golf cart path. (See Wetland Delineation Sketch included in Attachment 12.) Improvements along a portion of the existing cart path between the two existing irrigation ponds will result in an impact to approximately 500 square feet of regulated area. A majority of this impact will be temporary and related to the construction of a new bridge crossing.

The two small disturbed isolated wetland features located near the Huntington Facility compound will be directly impacted by the proposed access drive, which follows an existing path that travels through these wetland areas today. These small wetland areas were found to contain wetland soils within slight topographic hillside depressions located within a wooded path and adjacent to existing fill piles. These wetland areas provide little function or value (e.g., wildlife habitat, flood storage capacity, aesthetics, etc.) due to their disturbed nature, limited wetland vegetation diversity, isolation and small size. “Overall, the proposed development will result in impact to wetlands and two irrigation ponds totaling 1,490 square feet. It is important to point out that this wetland impact will only take place in the existing disturbed and degraded wetland areas. As a result, the proposed work will not adversely affect the function and value of these currently disturbed wetland areas, which have already been impacted by the existing site usage.” (See Wetland Impact Analysis, p. 2 included in Attachment 12).

In accordance with the Connecticut Soil Erosion Control Guidelines, as established by the Council for Soil and Water Conservation, adequate and appropriate soil erosion and sedimentation control measures will be established and maintained throughout the cell site construction period. In addition, Cellco will employ appropriate construction management practices to ensure that no pollutants would be discharged to any nearby watercourse or wetland areas or to area groundwater during the construction process.

According to the Federal Emergency Management Agency Flood Insurance Rate Map (“FIRM”), Community Panel Number 0900140012C (Map Revised: September 7, 2008), the Facility would be located in Flood Zone X, an area of minimal flooding. A copy of the FIRM is also included in Attachment 12.

**5. Local Input**

Section 16-50l(e) of the Connecticut General Statutes, as amended, requires local input on matters before the Council. On January 28, 2009, Cellco representatives met with Shelton's Mayor Mark A. Lauretti and Director of Planning, Rick Schultz, to commence the sixty (60) day municipal consultation process. Mayor Lauretti and Mr. Schultz received copies of technical information summarizing Cellco's plans to establish a telecommunications facility at the Property.

At the request of Mayor Lauretti, Cellco hosted a public information meeting on March 3, 2009, at the Shelton Community Center. Notice of this meeting was published in the *Connecticut Post* and was sent to all landowners whose property abuts the Property. The public information meeting was attended by approximately sixty (60) residents and other interested parties, including Mayor Lauretti.

In response to several issues raised at the public information meeting, Cellco changed its proposed access drive location and expanded its analysis of visual impacts on adjacent residential properties.

**6. Consultations With State and Federal Officials**

Attachment 11 and Section III.D. of the Application describe Cellco's consultations with state and federal officials regarding Cellco's proposed Huntington Facility.

**a. Federal Communications Commission**

The FCC did not review this particular proposal. As discussed above, FCC approval is not required where the authorized service area is not enlarged.

**b. Federal Aviation Administration**

As it does with all of its tower applications, Cellco conducted the appropriate air-space analysis for the proposed Huntington Facility to determine if the proposed tower would constitute

an obstruction or hazard to air navigation. Cellco's analysis has confirmed, pursuant to FAA standards and guidelines, that the proposed tower would not constitute an obstruction or hazard to air navigation and therefore no obstruction marking or lighting would be required. A copy of the Federal Airways & Airspace Summary Report is included in Attachment 13.

**c. United States Fish and Wildlife Service**

According to the USFWS, there are no federally-listed, threatened or endangered species that are known to occur in Shelton, Connecticut. (See VHB Memorandum dated February 17, 2009, included in Attachment 11).

**d. Connecticut Department of Environmental Protection**

(1) Environmental and Geographic Information Center

As discussed above, the DEP determined that there are no extant populations of Federal or State Endangered, Threatened or Special Concern Species that occur at the Property. (See DEP correspondence dated October 16, 2008 included in Attachment 11).

(2) Bureau of Air Management

Pursuant to R.C.S.A. § 22a-174-3, the on-site emergency back-up generator proposed as a part of this Application will require the issuance of a permit from the DEP Bureau of Air Management. As proposed, this emergency generator will be run only during the interruption of utility service to the cell site and periodically as required for maintenance purposes. Cellco will obtain the necessary permit prior to installing the generator at the Huntington Facility.

**e. Connecticut State Historic Preservation Officer**

As discussed above, Attachment 11 also includes the SHPO's determination that the proposed Huntington Facility will have no adverse effect on historic, architectural or archaeological resources listed on or eligible for the National Register of Historic Places.

**E. Estimated Cost and Schedule**

**1. Overall Estimated Costs**

The total estimated cost of construction of the proposed facility is \$805,000. This estimate includes:

(1)	Cell site radio equipment of approximately	\$450,000
(2)	Tower, coax and antenna costs of approximately	150,000
(3)	Power systems costs of approximately	20,000
(4)	Equipment building costs of approximately	50,000
(5)	Miscellaneous costs (including site preparation and installation) of approximately	135,000

**2. Overall Scheduling**

Site preparation and engineering would commence following Council approval of Cellco's Development and Maintenance ("D & M") plan and are expected to be completed within two to four weeks. Due to the delivery schedules of the manufacturers, installation of the building and installation of the tower are expected to take an additional two weeks. Equipment installation is expected to take an additional two weeks after installation of the building and installation of the tower. Cell site integration and system testing is expected to require two weeks after equipment installation.

**IV. CONCLUSION**

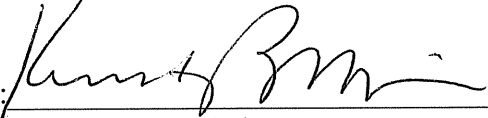

Based on the facts contained in this Application, Cellco submits that the establishment of the Huntington Facility, at the Property will not have any substantial adverse environmental effects. A public need exists for high quality reliable wireless service in the Huntington area and throughout upper Fairfield County, as determined by the FCC and the United States Congress, and a

competitive framework for providing such service has been established by the FCC and the Telecommunications Act of 1996. Cellco submits that the public need far outweighs any potential environmental effects resulting from the construction of the Huntington Facility.

WHEREFORE, Cellco respectfully requests that the Council grant this Application for a Certificate of Environmental Compatibility and Public Need for the proposed Huntington Facility.

Respectfully submitted,

CELLCO PARTNERSHIP D/B/A VERIZON  
WIRELESS

SITE NAME: HUNTINGTON FACILITY – Lane Street, Huntington, CT

GENERAL CELL SITE DESCRIPTION

Cellco's proposed Huntington Facility would be located on an approximately 99 acre parcel, a portion of which is located north of Lane Street in the Huntington section of the Town of Shelton, Connecticut (the "Property"). The Property is owned by Harry B. Brownson Country Club. The Huntington Facility would consist of a 120-foot telecommunications tower disguised as a pine tree and a 12' x 30' equipment shelter located near the base of the tower. Cellco antennas would be mounted with their centerline at the 120-foot level. Vehicular access to the site would extend from Lane Street a distance of 1,680 feet to the cell site. Utility access would extend from existing service on Lane Street.

## SITE EVALUATION REPORT

SITE NAME: HUNTINGTON FACILITY – Lane Street, Shelton, CT

### I. LOCATION

- A. COORDINATES: 41°-17'-42.506" N 73°-08'-14.644" W
- B. GROUND ELEVATION: Approximately 306± feet AMSL
- C. U.S.G.S. MAPS: Ansonia and Long Hill, CT
- D. SITE ADDRESS: Lane Street, Shelton, CT
- E. ZONING WITHIN 1/4 MILE OF SITE: Land within 1/4 mile of the cell site is zoned residential. Development within a 1/4 mile consists of residential (single and multi-family), private recreation uses (the Harry B. Brownson Country Club) and commercial uses in the “downtown” Huntington area.

### II. DESCRIPTION

- A. SITE SIZE: 100' x 100' Leased Area  
40' x 66' Site Compound
- B. LESSOR'S PARCEL: Approximately 99 acres
- C. TOWER TYPE/HEIGHT: 120' Monopole (“Tree”) Tower. 127' to top of simulated branches.
- D. SITE TOPOGRAPHY AND SURFACE: The tower site is located in the northeasterly portion of the Property. The Property is generally flat. Twenty trees, 6”or greater diameter at breast height, would be removed and minimal grading of the facility compound area would be required. A new access driveway would extend from Lane Street. Portions of the driveway would extend along existing cart paths on the property
- E. SURROUNDING TERRAIN, VEGETATION, WETLANDS, OR WATER: The tower is located in the southerly portion of the Country Club’s approximately 99 acre parcel. Cellco’s access driveway will follow an existing cart path between two ponds on the Country Club property. Two small isolated wetland areas would also be impacted near where the driveway enters the site compound.

- F. LAND USE WITHIN 1/4 MILE OF SITE: The Property is surrounded by residential (single and multi-family) uses to the north, east and south. To the west is the downtown Huntington area with its mix of commercial and residential land uses. (See Aerial Photograph at p. 2).

III. FACILITIES

- A. POWER COMPANY: Connecticut Light and Power
- B. POWER PROXIMITY TO SITE: Approximately 1,680 feet to the west along Lane Street.
- C. TELEPHONE COMPANY: AT&T
- D. PHONE SERVICE PROXIMITY: Same as power
- E. VEHICLE ACCESS TO SITE: Vehicle access to the site would extend directly from Lane Street a distance of approximately 1,680 feet. Portions of the access drive would utilize existing cart paths on the Property.
- F. CLEARING AND FILL REQUIRED: Some tree clearing (20 trees) and minimal site grading would be required for construction of the tower and site compound and access driveway. Detailed construction plans would be developed after approval by the Council. No significant trees will need to be removed to construct the Huntington Facility.

IV. LEGAL

- A. PURCHASE [ ] LEASE [X]
- B. OWNER: Brownson Country Club
- C. ADDRESS: 15 Soundview Avenue, Shelton, CT 06484
- D. DEED ON FILE AT: City of Shelton, CT Land Records

FACILITIES AND EQUIPMENT SPECIFICATION  
(NEW TOWER & EQUIPMENT BUILDING)

SITE NAME: HUNTINGTON FACILITY – Lane Street, Shelton, CT

I. TOWER SPECIFICATIONS:

- A. MANUFACTURER: To be determined
- B. TYPE: Self-supporting monopole – Tree tower
- C. TOWER HEIGHT: 120'  
127' to top of tree branches
- D. DIMENSIONS: Approx. 55" base  
Approx. 30" top

II. TOWER LOADING:

A. CELLCO EQUIPMENT:

- 1. Antennas (12)
  - Six Model LPA-185063/8CF (47.2" x 6.6" x 5.8") PCS antenna
  - Six Model DB846F65ZAXY (72" x 10" x 8.5") Cellular antenna
  - Three Model BXA-70063/6CF (71" x 11.2" x 4.5) 700 MHz antenna
  - Antenna Centerline 120' AGL
- 2. GPS Antenna: Mounted on the top of the equipment shelter
- 3. Transmission Lines:
  - a. MFG/Model: Andrews LDF5-50A
  - b. Size: 1 5/8"

III. ENGINEERING ANALYSIS AND CERTIFICATION:

The towers will be designed in accordance with Electronic Industries Association Standard EIA/TIA-222-E "Structural Standards for Steel Antenna Towers and Antenna Support Structures." The foundation designs would be based on soil conditions at the site. Details for the towers and foundation designs will be provided as a part of the final D&M Plan.

## ENVIRONMENTAL ASSESSMENT STATEMENT

SITE NAME: HUNTINGTON FACILITY – Lane Street, Shelton, CT

### I. PHYSICAL IMPACT

#### A. WATER FLOW AND QUALITY

No water flow and/or water quality changes are anticipated as a result of the construction or operation of the Huntington Facility. Two isolated wetland areas were identified immediately north of the facility compound.

#### B. AIR QUALITY

Under ordinary operating conditions, the equipment that would be used at the site would emit no air pollutants of any kind. For limited periods during power outages and periodically for maintenance purposes, minor levels of emissions from the on-site generator would result.

Pursuant to R.C.S.A. § 22a-174-3, the on-site emergency back-up generator proposed as a part of this application would require the issuance of a Connecticut Department of Environmental Protection Air Bureau permit for potential emissions. Cellco would obtain this permit prior to installing the generator at the approved cell site.

#### C. LAND

Minimal tree clearing and regrading will be required for the tower compound and portions of the proposed access driveway. The remaining portion of the Property would remain unchanged by the construction and operation of the Huntington Facility. Twenty (20) trees, six inches or greater at breast height, would need to be removed to construct the Huntington Facility.

#### D. NOISE

The equipment to be in operation at the Huntington Facility after construction would emit no noise of any kind, except for operation of the installed heating, air conditioning and ventilation systems and occasional operation of a back-up generator which would be run during power failures and periodically for maintenance purposes. Some noise is anticipated during cell site construction, which is expected to take approximately four to six weeks.

E. POWER DENSITY

The worst-case calculation of power density for Cellco's cellular and PCS antennas at the Huntington Facility would be 26.77% of the Standard.

F. VISIBILITY

See Visual Resource Evaluation Report included as Attachment 10.

**GENERAL NOTES**

- PROPOSED ANTENNA LOCATIONS AND HEIGHTS PROVIDED BY CELLCO PARTNERSHIP.

**SITE INFORMATION**

- THE SCOPE OF WORK SHALL INCLUDE:
- THE CONSTRUCTION OF A 40'x66' FENCED WIRELESS COMMUNICATIONS COMPOUND WITHIN A 100'x100' LEASE AREA.
  - A TOTAL OF UP TO FIFTEEN (15) DIRECTIONAL PANEL ANTENNAS ARE PROPOSED TO BE MOUNTED AT A CENTERLINE ELEVATION OF 120'-0"± AGL ON A 127' PROPOSED MONOPINE TOWER LOCATED CENTRALLY WITHIN THE PROPOSED COMPOUND.
  - TOTAL ACCESS LENGTH IS 1680'±. OF WHICH, APPROXIMATELY 1120' OF EXISTING CART PATH WILL BE UTILIZED.
  - POWER AND TELCO UTILITIES SHALL BE ROUTED UNDERGROUND FROM EXISTING RESPECTIVE DEMARCS TO THE PROPOSED UTILITY BACKBOARD LOCATED ADJACENT TO THE PROPOSED FENCED COMPOUND. UTILITIES WILL BE ROUTED FROM UTILITY BACKBOARD TO THE PROPOSED NOMINAL 12'x30' WIRELESS EQUIPMENT SHELTER LOCATED WITHIN THE COMPOUND. FINAL DEMARC LOCATION AND UTILITY ROUTING TO PROPOSED BACKBOARD WILL BE VERIFIED/DETERMINED BY LOCAL UTILITY COMPANIES.
  - FINAL DESIGN FOR TOWER AND ANTENNA MOUNTS SHALL BE INCLUDED IN THE FINAL CONSTRUCTION DOCUMENTS.
  - THE PROPOSED WIRELESS FACILITY INSTALLATION WILL BE DESIGNED IN ACCORDANCE WITH THE 2003 INTERNATIONAL BUILDING CODE AS MODIFIED BY THE 2005 CONNECTICUT SUPPLEMENT.
  - THERE WILL NOT BE ANY LIGHTING UNLESS REQUIRED BY THE FCC OR THE FAA.
  - THERE WILL NOT BE ANY SIGNS OR ADVERTISING ON THE ANTENNAS OR EQUIPMENT.
  - FOR ADDITIONAL NOTES AND DETAILS REFER TO THE ACCOMPANYING DRAWINGS.

**1 TYPICAL REINFORCEMENT BLANKET INSTALLATION ON SLOPE**

C-3 NOT TO SCALE

SLOPE APPLICATIONS:  
 A. PREPARE SOIL BEFORE INSTALLING BLANKETS, INCLUDING ANY NECESSARY APPLICATION OF LIME, FERTILIZER, AND SEED.

NOTE: WHEN USING CELL-O-SEED DO NOT SEED PREPARED AREA. CELL-O-SEED MUST BE INSTALLED WITH PAPER SIDE DOWN.

- B. BEGIN AT THE TOP OF THE SLOPE BY ANCHORING THE BLANKET IN A 6" DEEP BY 6" WIDE TRENCH WITH APPROXIMATELY 12" OF BLANKET EXTENDED BEYOND THE UP-SLOPE PORTION OF THE TRENCH. ANCHOR THE BLANKET WITH A ROW OF STAPLES/STAKES APPROXIMATELY 12" APART IN THE BOTTOM OF THE TRENCH. BACKFILL AND COMPACT THE TRENCH AFTER STAPLING. APPLY SEED TO COMPACTED SOIL AND FOLD REMAINING 12" PORTION OF BLANKET BACK OVER SEED AND COMPACTED SOIL. SECURE BLANKET OVER COMPACTED SOIL WITH A ROW OF STAPLE/STAKES SPACED APPROXIMATELY 12" APART ACROSS THE WIDTH OF THE BLANKET.
- C. ROLL THE BLANKET DOWN OR HORIZONTALLY ACROSS THE SLOPE. BLANKET WILL UNROLL WITH APPROPRIATE SIDE AGAINST THE SOIL SURFACE. ALL ROLLED EROSION CONTROL BLANKETS MUST BE SECURELY FASTENED TO SOIL SURFACE BY PLACING STAPLES/STAKES IN APPROPRIATE LOCATIONS AS SHOWN IN THE STAPLE PATTERN GUIDE. WHEN USING THE DOT SYSTEM<sup>TM</sup>, STAPLES/STAKES SHOULD BE PLACED THROUGH EACH OF THE COLORED DOTS CORRESPONDING TO THE APPROPRIATE STAPLE PATTERN.
- D. THE EDGES OF PARALLEL BLANKETS MUST BE STAPLED WITH APPROXIMATELY A 2'- 5" OVERLAP DEPENDING ON BLANKET TYPE.
- E. CONSECUTIVE ROLLED EROSION CONTROL BLANKET SPICED DOWN THE SLOPE MUST BE PLACED END OVER END (SINGLE STYLE) WITH AN APPROXIMATE 3" OVERLAP. STAPLE THROUGH OVERLAPPED AREA, APPROXIMATELY 12" APART ACROSS ENTIRE BLANKET WIDTH.
- \* IN LOOSE SOIL CONDITIONS, THE USE OF STAPLE OR STAKE LENGTHS GREATER THAN 6" MAY BE NECESSARY TO PROPERLY SECURE THE BLANKET.
- F. THE EDGE OF THE BLANKET IS TO EXTEND A MINIMUM 24 INCHES BEYOND THE TOE OF THE SLOPE AND ANCHORED BY PLACING THE STAPLES/ STAKES IN A 12 INCH DEEP X 6 INCH WIDE ANCHOR TRENCH. ANCHOR THE BLANKET WITH A ROW OF STAPLES/ STAKES SPACED APPROXIMATELY 12 INCH APART IN THE TRENCH. BACKFILL AND COMPACT THE TRENCH AFTER STAPLING (STONE OR SOIL MAY BE USED AS BACKFILL).
- G. REFER TO MANUFACTURERS STAPLE GUIDE FOR CORRECT STAPLE PATTERN. MINIMUM 4 SPIKES PER ONE SQ. FT.

THE CONTRACTOR SHALL MAINTAIN THE BLANKET UNTIL ALL WORK ON THE CONTRACT HAS BEEN COMPLETED AND ACCEPTED. MAINTENANCE SHALL CONSIST OF THE REPAIR OF AREAS WHERE DAMAGED BY ANY CAUSE. ALL DAMAGED AREAS SHALL BE REPAIRED TO REESTABLISH THE CONDITIONS AND GRADE OF THE SOIL PRIOR TO APPLICATION OF THE COVERING AND SHALL BE REFERTILIZED, RESEED, AND REMULCHED AS DIRECTED.

**EROSION CONTROL**

**GENERAL CONSTRUCTION SEQUENCE**

THIS IS A GENERAL CONSTRUCTION SEQUENCE OUTLINE SOME ITEMS OF WHICH MAY NOT APPLY TO PARTICULAR SITES.

- CUT AND STUMP AREAS OF PROPOSED CONSTRUCTION.
- INSTALL TEMPORARY SEDIMENT AND EROSION CONTROL MEASURES AS REQUIRED.
- REMOVE AND STOCKPILE TOPSOIL. STOCKPILE SHALL BE SEED TO PREVENT EROSION.
- CONSTRUCT CLOSED DRAINAGE SYSTEM. PRECEPT CULVERT INLETS AND CATCH BASINS WITH SEDIMENTATION BARRIERS.
- CONSTRUCT ROADWAYS AND PERFORM SITE GRADING, PLACING HAY BALES AND SILTATION FENCES AS REQUIRED TO CONTROL SOIL EROSION.
- INSTALL UNDERGROUND UTILITIES.
- BEGIN TEMPORARY AND PERMANENT SEEDING AND MULCHING. ALL CUT AND FILL SLOPES SHALL BE SEED OR MULCHED IMMEDIATELY AFTER THEIR CONSTRUCTION. NO AREA SHALL BE LEFT UNSTABILIZED FOR A TIME PERIOD OF MORE THAN 30 DAYS.
- DAILY, OR AS REQUIRED, CONSTRUCT, INSPECT, AND IF NECESSARY, RECONSTRUCT TEMPORARY BERMS, DRAINS, DITCHES, SILT FENCES AND SEDIMENT TRAPS INCLUDING MULCHING AND SEEDING.
- BEGIN EXCAVATION FOR AND CONSTRUCTION OF TOWERS AND PLATFORMS.
- FINISH PAVING ALL ROADWAYS, DRIVES, AND PARKING AREAS.
- COMPLETE PERMANENT SEEDING AND LANDSCAPING.
- NO FLOW SHALL BE DIVERTED TO ANY WETLANDS UNTIL A HEALTHY STAND OF GRASS HAS BEEN ESTABLISHED IN REGARDED AREAS.
- AFTER GRASS HAS BEEN FULLY GERMINATED IN ALL SEEDING AREAS, REMOVE ALL TEMPORARY EROSION CONTROL MEASURES.

**CONSTRUCTION SPECIFICATIONS - SILT FENCE**

- THE GEOTEXTILE FABRIC SHALL MEET THE DESIGN CRITERIA FOR SILT FENCES.
- THE FABRIC SHALL BE EMBEDDED A MINIMUM OF 8 INCHES INTO THE GROUND AND THE SOIL COMPACTED OVER THE EMBEDDED FABRIC.
- WOVEN WIRE FENCE SHALL BE FASTENED SECURELY TO THE FENCE POSTS WITH WIRE TIES OR STAPLES.
- FILTER CLOTH SHALL BE FASTENED SECURELY TO THE WOVEN WIRE FENCE WITH TIES SPACED EVERY 24 INCHES AT THE TOP, MID-SECTION AND BOTTOM.
- WHEN TWO SECTIONS OF FILTER CLOTH ADJOIN EACH OTHER, THEY SHALL BE OVERLAPPED BY 6 INCHES, FOLDED, AND STAPLED.
- FENCE POSTS SHALL BE A MINIMUM OF 36 INCHES LONG AND DRIVEN A MINIMUM OF 16 INCHES INTO THE GROUND. WOOD POSTS SHALL BE OF SOUND QUALITY HARDWOOD AND SHALL HAVE A MINIMUM CROSS SECTIONAL AREA OF 3.0 SQUARE INCHES.
- MAINTENANCE SHALL BE PERFORMED AS NEEDED TO PREVENT BUILD UP IN THE SILT FENCE DUE TO DEPOSITION OF SEDIMENT.

**MAINTENANCE - SILT FENCE**

- SILT FENCES SHALL BE INSPECTED IMMEDIATELY AFTER EACH RAINFALL AND AT LEAST DAILY DURING PROLONGED RAINFALL. ANY REPAIRS THAT ARE REQUIRED SHALL BE MADE IMMEDIATELY.
- IF THE FABRIC ON A SILT FENCE SHOULD DECOMPOSE OR BECOME INEFFECTIVE DURING THE EXPECTED LIFE OF THE FENCE, THE FABRIC SHALL BE REPLACED PROMPTLY.
- SEDIMENT SHOULD BE INSPECTED AFTER EVERY STORM EVENT. THE DEPOSITS SHOULD BE REMOVED WHEN THEY REACHED APPROXIMATELY ONE-HALF THE HEIGHT OF THE BARRIER.
- SEDIMENT DEPOSITS THAT ARE REMOVED OR LEFT IN PLACE AFTER THE FABRIC HAS BEEN REMOVED SHALL BE GRADED TO CONFORM WITH THE EXISTING TOPOGRAPHY AND VEGETATED.

EQUIPMENT SHELTER BY CELLXION. VERIFY ALL SHELTER DIMENSIONS, EQUIPMENT DIMENSIONS, EQUIPMENT LOCATIONS AND UTILITY OPENINGS WITH BUILDING SHOP DRAWINGS PRIOR TO COMMENCEMENT OF WORK.

**2 TYPICAL SECTION**  
C-5 SCALE: 1/2"=1'-0"

**2A FOUNDATION PLAN SLAB ON GRADE ALTERNATE**  
C-5 SCALE: 1/2"=1'-0"

**FOUNDATION NOTES:**

- IF ANY FIELD CONDITIONS EXIST WHICH PRECLUDE COMPLIANCE WITH THE DRAWINGS, THE CONTRACTOR SHALL IMMEDIATELY NOTIFY THE ENGINEER AND SHALL NOT PROCEED WITH ANY AFFECTED WORK.
- DIMENSIONS AND DETAILS SHALL BE CHECKED AGAINST THE PRE MANUFACTURED EQUIPMENT BUILDING SHOP DRAWINGS.
- THE CONTRACTOR SHALL VERIFY AND COORDINATE THE SIZE AND LOCATION OF ALL OPENINGS, SLEEVES AND ANCHOR BOLTS AS REQUIRED BY ALL TRADES.
- REFER TO DRAWING T1 FOR ADDITIONAL NOTES AND REQUIREMENTS.

**SITE NOTES:**

- THE CONTRACTOR SHALL CALL UTILITIES PRIOR TO THE START OF CONSTRUCTION.
- ACTIVE EXISTING UTILITIES, WHERE ENCOUNTERED IN THE WORK, SHALL BE PROTECTED AT ALL TIMES. THE ENGINEER SHALL BE NOTIFIED IMMEDIATELY, PRIOR TO PROCEEDING, SHOULD ANY UNCOVERED EXISTING UTILITY PRECLUDE COMPLETION OF THE WORK IN ACCORDANCE WITH THE CONTRACT DOCUMENTS.
- ALL RUBBISH, STUMPS, DEBRIS, STICKS, STONES AND OTHER REFUSE SHALL BE REMOVED OFF SITE AND BE LEGALLY DISPOSED, AT NO ADDITIONAL COST.
- THE SITE SHALL BE GRADED TO CAUSE SURFACE WATER TO FLOW AWAY FROM THE EQUIPMENT AND TOWER AREAS.
- NO FILL OR EMBANKMENT MATERIAL SHALL BE PLACED ON FROZEN GROUND. FROZEN MATERIALS, SNOW OR ICE SHALL NOT BE PLACED IN ANY FILL OR EMBANKMENT.
- THE SUBGRADE SHALL BE COMPACTED AND BROUGHT TO A SMOOTH UNIFORM GRADE PRIOR TO FINISHED SURFACE APPLICATION.
- THE AREAS OF THE COMPOUND DISTURBED BY THE WORK SHALL BE RETURNED TO THEIR ORIGINAL CONDITION.
- CONTRACTOR SHALL MINIMIZE DISTURBANCE TO EXISTING SITE DURING CONSTRUCTION. EROSION CONTROL MEASURES, SHALL BE IN CONFORMANCE WITH THE LOCAL GUIDELINES FOR EROSION AND SEDIMENT CONTROL.
- IF ANY FIELD CONDITIONS EXIST WHICH PRECLUDE COMPLIANCE WITH THE DRAWINGS, THE CONTRACTOR SHALL IMMEDIATELY NOTIFY THE ENGINEER AND SHALL PROCEED WITH AFFECTED WORK AFTER CONFLICT IS SATISFACTORILY RESOLVED.
- DIMENSIONS AND DETAILS SHALL BE CHECKED AGAINST THE PRE MANUFACTURED EQUIPMENT BUILDING SHOP DRAWINGS.
- THE CONTRACTOR SHALL VERIFY AND COORDINATE THE SIZE AND LOCATION OF ALL OPENINGS, SLEEVES AND ANCHOR BOLTS AS REQUIRED BY ALL TRADES.

**COMPACTED GRAVEL FILL:**

- COMPACTED GRAVEL FILL SHALL BE FURNISHED AND PLACED AS A FOUNDATION FOR STRUCTURES, WHERE SHOWN ON THE CONTRACT DRAWINGS OR DIRECTED BY THE ENGINEER.
- GRAVEL SHALL CONFORM TO THE REQUIREMENTS OF ARTICLE M.02.02 OF THE CONNECTICUT D.O.T. STANDARD SPECIFICATIONS. ADMIXTURES AND SURFACE PROTECTIVE MATERIALS USED TO PREVENT THE GRAVEL FROM FREEZING MUST MEET THE APPROVAL OF THE ENGINEER. THE LARGEST STONE SIZE SHALL BE 3-1/2 INCHES.
- SAMPLES OF THE MATERIAL TO BE USED SHALL BE DELIVERED TO THE JOB SITE 5 DAYS PRIOR TO ITS INTENDED USE SO IT MAY BE TESTED FOR APPROVAL.
- AFTER ALL EXCAVATION HAS BEEN COMPLETED, GRAVEL SHALL BE DEPOSITED IN LAYERS NOT EXCEEDING EIGHT (8) INCHES IN DEPTH OVER THE AREAS. IN EXCEPTIONAL CASES, THE ENGINEER MAY PERMIT THE FIRST LAYER TO BE THICKER THAN EIGHT (8) INCHES. EACH LAYER SHALL BE LEVELED OFF BY SUITABLE EQUIPMENT. THE ENTIRE AREA OF EACH LAYER SHALL BE COMPACTED BY USE OF APPROVED VIBRATORY, PNEUMATIC-TIRED OR TREAD-TYPE COMPACTOR EQUIPMENT. COMPACTOR SHALL BE CONTINUED UNTIL THE DRY DENSITY OVER THE ENTIRE AREA OF EACH LAYER IS NOT LESS THAN 95 PERCENT OF THE MAXIMUM DRY DENSITY ACHIEVED BY AASHTO T-99 METHOD C. THE MOISTURE CONTENT OF THE GRAVEL SHALL NOT VARY BY MORE THAN 3%± FROM ITS OPTIMUM MOISTURE CONTENT. NO SUBSEQUENT LAYER SHALL BE DEPOSITED UNTIL THE SPECIFIED COMPACTION IS ACHIEVED FOR THE PREVIOUS LAYER. IF NECESSARY TO OBTAIN THE REQUIRED COMPACTION, WATER SHALL BE ADDED AND GENTLE PUDDLING PERFORMED IF AUTHORIZED. COMPACTED GRAVEL FILL SHALL BE PREVENTED FROM FREEZING BY USE OF APPROVED ADMIXTURES OR BY USE OF APPROVED PROTECTIVE MATERIALS ON THE SURFACE, OR BOTH.

**CONCRETE AND REINFORCING STEEL NOTES:**

- ALL CONCRETE WORK SHALL BE IN ACCORDANCE WITH THE ACI 301, ACI 318.
- ALL CONCRETE SHALL BE NORMAL WEIGHT, 6% AIR ENTRAINED WITH A MAXIMUM SLUMP OF 4", AND SHALL HAVE A MINIMUM COMPRESSIVE STRENGTH OF 3,000 PSI AT 28 DAYS, UNLESS NOTED OTHERWISE ON THE DRAWINGS.
- REINFORCING STEEL SHALL CONFORM TO ASTM A615, GRADE 60, DEFORMED BARS. WELDED WIRE FABRIC SHALL CONFORM TO ASTM A185 WELDED STEEL WIRE FABRIC. SPLICES SHALL BE CLASS "B" AND ALL HOOKS SHALL BE STANDARD UNLESS OTHERWISE INDICATED.
- THE FOLLOWING MINIMUM CONCRETE COVER SHALL BE PROVIDED FOR REINFORCING STEEL UNLESS OTHERWISE NOTED ON THE DRAWINGS:  
 CONCRETE CAST AGAINST EARTH.....3 IN.  
 CONCRETE EXPOSED TO EARTH OR WEATHER:  
 #6 AND LARGER.....2 IN.  
 #5 AND SMALLER & WWF.....1 1/2 IN.  
 CONCRETE NOT EXPOSED TO EARTH OR WEATHER OR NOT CAST AGAINST THE GROUND:  
 SLAB AND WALL.....3/4 IN.  
 BEAMS AND COLUMNS.....1 1/2 IN.
- ALL EXPOSED EDGES OF CONCRETE TO RECEIVE A 3/4" CHAMFER IN ACCORDANCE WITH ACI 301 SECTION 4.2.4.
- CONCRETE EQUIPMENT PAD TO RECEIVE A BRUSHED FINISH.
- INSTALLATION OF CONCRETE EXPANSION/WEDGE ANCHOR, SHALL BE PER MANUFACTURER'S WRITTEN RECOMMENDED PROCEDURE. THE ANCHOR BOLT, DOWEL OR ROD SHALL CONFORM TO MANUFACTURER'S RECOMMENDATION FOR EMBEDMENT DEPTH OR AS SHOWN ON THE DRAWINGS. NO REBAR SHALL BE CUT DURING DRILLING WITHOUT PRIOR REVIEW BY THE ENGINEER.

## APPLICATION GUIDE<sup>1</sup>

- App. p. i (A) An Executive Summary on the first page of the application with the address, proposed height, and type of tower being proposed. A map showing the location of the proposed site should accompany the description;
- App. pp. 1-3 (B) A brief description of the proposed facility, including the proposed locations and heights of each of the various proposed sites of the facility, including all candidates referred to in the application;
- App. pp. 1-3 (C) A statement of the purpose for which the application is made;
- App. p. 1 (D) A statement describing the statutory authority for such application;
- App. p. 4 (E) The exact legal name of each person seeking the authorization or relief and the address or principal place of business of each such person. If any applicant is a corporation, trust association, or other organized group, it shall also give the state under the laws of which it was created or organized;
- App. p. 4 (F) The name, title, address and telephone number of the attorney or other person to whom correspondence or communications in regard to the application are to be addressed. Notice, orders, and other papers may be served upon the person so named, and such service shall be deemed to be service upon the applicant;
- App. p. 8  
Attachments 1 and 7 (G) A statement of the need for the proposed facility with as much specific information as is practicable to demonstrate the need, including a description of the proposed system and how the proposed facility would eliminate or alleviate any existing deficiency or limitation;
- App. p. 12 (H) A statement of the benefits expected from the proposed facility with as much specific information as is practicable;

---

<sup>1</sup> This Application Guide is copied directly from the "Connecticut Siting Council Application Guide," Section VI, as amended February 16, 2007. References to the Regulations of Connecticut State Agencies ("RCSA") contained in the Guide have been omitted.

App. pp. 1-3, 8-11  
Attachments 1 and 7

- (I) A description of the proposed facility at the named sites including:
  - (1) Height of the tower and its associated antennas including a maximum “not to exceed height” for the facility, which may be higher than the height proposed by the Applicant;
  - (2) Access roads and utility services;
  - (3) Special design features;
  - (4) Type, size, and number of transmitters and receivers, as well as the signal frequency and conservative worst-case and estimated operational level approximation of electro magnetic radio frequency power density levels (facility using FCC Office of Engineering and Technology Bulletin 65, August 1997) at the base of the tower base, site compound boundary where persons are likely to be exposed to maximum power densities from the facility;
  - (5) A map showing any fixed facilities with which the proposed facility would interact;
  - (6) The coverage signal strength, and integration of the proposed facility with any adjacent fixed facility, to be accompanied by multi-colored propagation maps of red, green and yellow (exact colors may differ depending on computer modeling used, but a legend is required to explain each color used) showing interfaces with any adjacent service areas, including a map scale and north arrows; and
  - (7) For cellular systems, a forecast of when maximum capacity would be reached for the proposed facility and for facilities that would be integrated with the proposed facility.

Attachment 1

- (J) A description of the named sites, including:
- (1) The most recent U.S.G.S. topographic quadrangle map (scale 1 inch = 2,000 feet) marked to show the site of the facility and any significant changes within a one-mile radius of the site;
  - (2) A map (scale not less than 1 inch = 200 feet) of the lot or tract on which the facility is proposed to be located showing the acreage and dimensions of such site, the name and location of adjoining public roads or the nearest public road, and the names of abutting owners and the portions of their lands abutting the site;
  - (3) A site plan (scale not less than 1 inch = 40 feet) showing the proposed facility, set back radius, existing and proposed contour elevations, 100-year flood zones, waterways, wetlands, and all associated equipment and structures on the site;
  - (4) Where relevant, a terrain profile showing the proposed facility and access road with existing and proposed grades; and
  - (5) The most recent aerial photograph (scale not less than 1 inch = 1,000 feet) showing the proposed site, access roads, and all abutting properties.

Attachment 1

- (K) A statement explaining mitigation measures for the proposed facility including:
- (1) Construction techniques designed specifically to minimize adverse effects on natural areas and sensitive areas;
  - (2) Special design features made specifically to avoid or minimize adverse effects on natural areas and sensitive areas;
  - (3) Establishment of vegetation proposed near residential, recreation, and scenic areas; and
  - (4) Methods for preservation of vegetation for wildlife habitat and screening.

App. pp. 1-3 and 16  
Attachment 10

- (L) A description of the existing and planned land uses of the named sites and surrounding areas;

- App. pp. 12-16  
Attachments 10 and 11 (M) A description of the scenic, natural, historic, and recreational characteristics of the names sites and surrounding areas including officially designated nearby hiking trails and scenic roads;
- Attachment 10 (N) Sight line graphs to the named sites from visually impacted areas such as residential developments, recreational areas and historic sites;
- Attachment 9 (O) A list describing the type and height of all existing and proposed towers and facilities within a four mile radius within the site search area, or within any other area from which use of the proposed towers might be feasible from a location standpoint for purposes of the application;
- App. pp. 10-11  
Attachment 9 (P) A description of efforts to share existing towers, or consolidate telecommunications antennas of public and private services onto the proposed facility including efforts to offer tower space, where feasible, at no charge for space for municipal antennas;
- App. p. 10  
Attachment 1 (Q) A description of technological alternatives and a statement containing justification for the proposed facility;
- Attachment 9 (R) A description of rejected sites with a U.S.G.S. topographic quadrangle map (scale 1 inch = 2,000 feet) marked to show the location of rejected sites;
- App. pp. 10-11  
Attachments 1 and 9 (S) A detailed description and justification for the site(s) selected, including a description of siting criteria and the narrowing process by which other possible sites were considered and eliminated including, but not limited to, environmental effects, cost differential, coverage lost or gained, potential interference with other facilities, and signal loss due to geographic features compared to the proposed site(s);
- App. pp. 15-16 (T) A statement describing hazards to human health, if any, with such supporting data and references to regulatory standards;
- App. p. 23 (U) A statement of estimated costs for site acquisition, construction, and equipment for a facility at the various proposed sites of the facility, including all candidates referred to in the application;

- App. p. 23 (V) A schedule showing the proposed program of site acquisition, construction, completion, operation and relocation or removal of existing facilities for the named sites;
- App. p. 14 (W) A statement indicating that, weather permitting, the applicant will raise a balloon with a diameter of at least three feet, at the sites of the various proposed sites of the facility, including all candidates referred to in the application, on the day of the Council's first hearing session on the application or at a time otherwise specified by the Council. For the convenience of the public, this event shall be publicly noticed at least 30 days prior to the hearing on the application as scheduled by the Council;
- App. pp. 14-20 Attachments 1, 11 and 12 Bulk File Exhibits (X) Such information as any department or agency of the State exercising environmental controls may, by regulation, require including:
- (1) A listing of any federal, state, regional, district, and municipal agencies, including but not limited to the Federal Aviation Administration; Federal Communications Commission; State Historic Preservation Officer; State Department of Environmental Protection; and local conservation, inland wetland, and planning and zoning commissions with which reviews were conducted concerning the facility, including a copy of any agency position or decision with respect to the facility; and
  - (2) The most recent conservation, inland wetland, zoning, and plan of development documents of the municipality, including a description of the zoning classification of the site and surrounding areas, and a narrative summary of the consistency of the project with the Town's regulations and plans.
- Attachment 1 (Project Plans) (Y) Description of proposed site clearing for access road and compound including type of vegetation scheduled for removal and quantity of trees greater than six inches diameter at breast height and involvement with wetlands;
- N/A (Z) Such information as the applicant may consider relevant.

## CERTIFICATION OF SERVICE

## LEGAL NOTICE

Notice is hereby given, pursuant to Section 16-50**l**(b) of the Connecticut General Statutes and Regulations pertaining thereto, of an Application to be submitted to the Connecticut Siting Council (“Council”) on or about July 15, 2009, by Cellco Partnership d/b/a Verizon Wireless (“Cellco” or the “Applicant”). The Application proposes the installation of a wireless telecommunications facility in the City of Shelton, Connecticut. The installation would consist of a 100’ x 100’ leased area and a 40’ x 66’ fenced compound on an approximately 99 acre parcel owned by The Brownson Country Club. At this site, Cellco proposes to construct a 120-foot monopole tower disguised as a pine tree. Access to the site will extend from Lane Street to the cell site. Cellco will also install a new 12’ x 30’ shelter located near the base of the tower to house its radio equipment and a back-up generator. The location and other features of the proposed facility are subject to change under provisions of Connecticut General Statutes § 16-50g et. seq.

On the day selected for the Siting Council public hearing on this proposal, Cellco will fly a balloon at the height of the proposed tower. Interested parties and residents of the City of Shelton are invited to review the Application during normal business hours at any of the following offices:

Connecticut Siting Council  
10 Franklin Square  
New Britain, CT 06051

City Clerk  
City of Shelton  
54 Hill Street  
Shelton, CT 06484

Cellco Partnership d/b/a Verizon Wireless

**Re: Cellco Partnership d/b/a Verizon Wireless  
Proposed Telecommunications Facility  
Lane Street, Huntington, Connecticut**

Dear «Salutation»:

Cellco Partnership d/b/a Verizon Wireless (“Cellco”) will be submitting an application to the Connecticut Siting Council (“Council”) on or about July 15, 2009, for approval of the construction of a telecommunications facility in the Huntington section of the City of Shelton, Connecticut.

The facility would consist of a new 120-foot self-supporting monopole tower disguised as a pine tree and a 12’ x 30’ equipment shelter. Simulated branches will extend an additional seven (7) feet above the tower to a height of 127’. The facility compound will be located in the southerly portion of the approximately 99 acre parcel owned by Brownson Country Club located north of Lane Street. An on-site backup generator would also be installed inside Cellco’s shelter. The tower and facility compound would be designed to accommodate multiple carriers. Access to this site would extend from Lane Street. Attached to this letter is a set of project plans showing the cell site location described above. The location and other features of the proposed facility are subject to change under the provisions of Connecticut General Statutes § 16-50g et seq.

State law provides that owners of record of property which abuts a parcel on which the proposed facility may be located must receive notice of the submission of this application. This notice is directed to you either because you may be an abutting land owner or as a courtesy notice.

July 9, 2009  
Page 2

If you have any questions concerning the application, please direct them to either the Connecticut Siting Council or me. My address and telephone number are listed above. The Siting Council may be reached at its New Britain, Connecticut office at (860) 827-2935.

Very truly yours,

A handwritten signature in black ink, appearing to read "Kenneth C. Baldwin". The signature is fluid and cursive, with a long horizontal stroke at the end.

Kenneth C. Baldwin

**Waivers/Conditions:**

If the facilities authorized herein are used to provide broadcast operations, whether exclusively or in combination with other services, the licensee must seek renewal of the license either within eight years from the commencement of the broadcast service or within the term of the license had the broadcast service not been provided, whichever period is shorter in length. See 47 CFR §27.13(b).

**Conditions:**

Pursuant to §309(h) of the Communications Act of 1934, as amended, 47 U.S.C. §309(h), this license is subject to the following conditions: This license shall not vest in the licensee any right to operate the station nor any right in the use of the frequencies designated in the license beyond the term thereof nor in any other manner than authorized herein. Neither the license nor the right granted thereunder shall be assigned or otherwise transferred in violation of the Communications Act of 1934, as amended. See 47 U.S.C. § 310(d). This license is subject in terms to the right of use or control conferred by §706 of the Communications Act of 1934, as amended. See 47 U.S.C. §606.

To view the geographic areas associated with the license, go to the Universal Licensing System (ULS) homepage at <http://wireless.fcc.gov/uls> and select "License Search". Follow the instructions on how to search for license information.
