***Re: Docket No. 385 – Application of T-Mobile Northeast, LLC,
For a Certificate of Environmental Compatibility and Public
Need for the Construction, Maintenance and Operation of a
Telecommunications Facility at 23 Stonybrook Road in
the Town of Stratford, Connecticut***

Dear Mr. Phelps:

Enclosed herein please find an original and twenty (20) copies of the following documents requested by the Connecticut Siting Council ("Council") during the hearing on December 8, 2009, as late-filed documents and information in the above-captioned matter:

1. Updated power density calculations and technical memorandum showing calculations for the two separate antenna heights (GSM and UMTS);
2. A letter from Dean Gustafson, Senior Environmental Scientist, VHB, addressing (a) the upland review area for Bruce Brook and (b) the reasons why an environmental assessment is unnecessary; and
3. A copy of the December 28, 2009 letter to the Town of Stratford regarding the proposed Facility at 23 Stonybrook Road ("Facility").

Mr. S. Derek Phelps
Connecticut Siting Council
January 7, 2010
Page 2

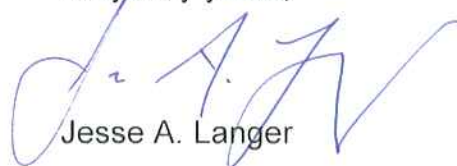

Additionally, the following addresses questions raised by the Council during the proceedings:

1. *Dropped call statistics.* In the general area of the proposed Facility, T-Mobile's dropped call percentage is approximately 1.4 percent. This percentage is significant given the location and size of the area surrounding the site of the proposed Facility. Aside from dropped calls, the Facility is necessary to provide consistent and reliable coverage to existing and future T-Mobile customers in this area of Stratford. T-Mobile has established a need for improved service in this area, as demonstrated in the Application and related filings, as well as the testimony during the hearing on December 8, 2009.

2. *Characteristics of the Sikorsky on-air site (CT11244D).* This facility is located on a rooftop at 3191 Broadbridge Avenue, Stratford, Connecticut. This site is located to the west of the proposed Facility. T-Mobile has three sectors Ballast mounted fifteen feet above the rooftop. This is the greatest height possible with a standard Ballast mount without requiring structural upgrades.

3. *Alternative sites along Nichols Avenue.* The majority of the large, non-residential properties along Nichols Avenue are owned by the Town of Stratford. T-Mobile has attempted to communicate with the Town on numerous occasions during the pendency of this docket, most recently via letter dated December 28, 2009, which is attached hereto. T-Mobile has yet to receive any response from the Town of Stratford.

Very truly yours,

Jesse A. Langer
