Hi, Monte,

We have a large wetlands map but it only shows general locations. The actual wetlands line has to be flagged by a soil scientist when work is proposed. That line is then brought to the Inland Wetlands Agency for acceptance and filed on the land records. The attached two maps may be helpful to you. They were the only two that I could find on a quick look. Bob Kuchta, the IW Agent, is out of the office until Thursday and he might have additional information. He can be reached at the same number as me.

Can you also send us 14 copies of the original submission so that we can distribute that along with the new information?

Thanks! Marilyn

Marilyn,

It was nice to talk to you yesterday, and to introduce myself.

It is my understanding that the Town has a large wetlands map which is located in the wetlands office. I also understand that copies of the map are not available. Can you please let me know if this is correct? If my understanding is not correct, please let me know where I can get a copy of the map.

I look forward to meeting you on the 6th. As I mentioned we anticipate submitting the additional materials this week. If you have any questions or comments, please feel free to contact me.

Thank you,
Monte
