**RE: Docket No. 416 – Certification of Compliance with D&M Plan Conditions
2627 Day Hill Road, Bloomfield, CT
ATC Site: 283562 North Bloomfield CT**

Dear Ms. Bachman,

In response to a letter sent by the Connecticut Siting Council (the “Council”) to American Tower Corporation on August 8, 2018, this letter serves to provide the Council with the requested information needed to comply with the Development and Management (D&M) Plan conditions set forth in Section 16-50j-75 to 16-50j-77 of the Regulations of Connecticut State Agencies (“RCSA”).

On April 14, 2011, the Council issued a Certificate of Environmental Compatibility and Public Need (the “Certificate”) in Docket 416 to Celco Partnership d/b/a Verizon Wireless, to allow for the installation of a telecommunications tower facility at 2627 Day Hill Road in Bloomfield (the “Tower”). Per the CSC database of approved telecommunications sites, the Certificate was subsequently transferred to Construction Tower Services, LLC by the Council on December 13, 2012, and then to American Towers LLC on March 5, 2015. It was recently brought to our attention that the original tower developer did not comply with the D&M Plan conditions set forth in Section 16-50j-75 to 16-50j-77 of the RCSA. Since American Tower is now the owner of the Tower, we are submitting this statement in an effort to satisfy these requirements.

As American Tower was not the original tower developer, our knowledge of the construction of the Tower is limited to documentation provided to us by Construction Tower Services, LLC, from whom we purchased the tower in 2014. Construction Tower Services, LLC has not provided specific documentation on the four items requested in the CSC letter, namely: (1) notification of commencement of construction, (2) monthly progress reports, (3) notification of completion of construction and commencement of operation, and (4) final report. However, based on documentation received from Construction Tower Services, LLC in 2014, it appears construction of the Tower commenced after issuance of a Building Permit (Permit #B-12-2985) by the Town of Bloomfield on May 30, 2012, and was completed prior to the issuance of a Certificate of Use and Occupancy by the Town of Bloomfield on February 3, 2014. The facility likely went on-air on shortly after the final inspection was issued on February 3, 2014.

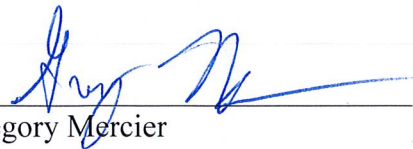

Furthermore, in accordance with the 'final report' requirements of RCSA Section 16-50j-77(c), American Tower states that to the best of its knowledge, based on its review of documents provided by Construction Tower Services, LLC and our personal knowledge since taking ownership of the site in 2015:

1. Cellco Partnership d/b/a Verizon Wireless, Construction Tower Services, LLC and American Towers LLC did not enter into any additional agreements with abutting or other property owners regarding special maintenance precautions;
2. Cellco Partnership d/b/a Verizon Wireless, Construction Tower Services, LLC and American Towers LLC did not develop or incorporate any significant modifications to the approved D&M Plan relating to rights of underlying or adjoining property owners;
3. No construction materials were required to be left in place as a part of the project development;
4. There are no special areas where special planting or reseeding had to be completed; and
5. There are no agreements in place that relate to any public recreational use of the portion of the underlying property used for wireless telecommunications purposes.

Please let me know if members of the Council or Staff need any additional information regarding the foregoing. Thank you very much for your consideration.

Sincerely,

Gregory Mercier
Supervising Attorney, US Tower Division
American Tower Corporation
