Re: Docket No. 418: New Cingular Wireless PCS, LLC application for a Certificate of Environmental Compatibility and Public Need for the construction, maintenance and operation of a telecommunications facility located off Tolland Turnpike or off Old South Willington Road, Willington, Connecticut

Dear Ms. Roberts:

The Drinking Water Section (DWS) of the Department of Public Health has reviewed the location and specific work items associated with the above noted Docket Number. This project is contained within the public water supply watershed (Willimantic Reservoir Watershed) of Mansfield Hollow Reservoir, an active source of public drinking water for the Windham Water Works System (PWSID #CT1630011). The DWS offers the following recommendations to protect this source of public drinking water:

- Erosion and sedimentation controls should be in place and properly maintained as necessary.
- A responsible party should be identified for maintenance, inspection, repair, and replacement and incorporation of new controls as may become necessary.
- Servicing of machinery should be completed outside of the public water supply watershed.
- Refueling of vehicles or machinery should take place on an impervious pad with secondary containment designed to contain fuels.
- Fuel and other hazardous materials should not be stored within the public water supply watershed. Any fuel or hazardous materials that must be kept within the public water supply watershed during working hours should be stored on an impervious surface utilizing secondary containment.
- A fuel spill remediation kit should be stored on-site so that any spills may be contained and cleaned quickly.
- Windham Water Works System should be contacted prior to starting this project to review the scope of this project.
- Windham Water Works System personnel should be allowed to periodically inspect this project to ensure that drinking water quality is not being adversely impacted.

If you have any questions regarding this matter, please contact Kimberly Wholean of this office at 860-509-7333.

Sincerely,

Eric McPhee
Supervising Environmental Analyst
Drinking Water Section
