

Questions from the Riverside Community

1. This proposed tower in East Haven is being put in a highly populated residential area where the houses are quit close together. If this tower were to fall would it hit any of these pre-existing buildings, homes or cause damage to home owners property?
2. Will you be able to see this structure from Long Island Sound/Farm River?
3. Westwoods Rd. proposal in Branford was turned down because it is a recreational park. East Haven has two recreational parks in the immediate area, Farm River State Park and Greenway Trail, how come this has not been taken into consideration?
4. What does within regulation mean as far as electromagnetic radiation?
5. How much is too much radiation in a neighborhood?
6. Are you 100% positive that this will have no health effects down the road? It doesn't seem as though anyone is sure of this because cancer takes a long time to form and towers have not been around long enough to rule this out. So my question is if this neighborhood ends up with health issues/cancer clusters/etc. will you be liable?
7. What will this do for the value of our homes? Will you be held liable for our financial losses?
8. What are the restrictions of having a cell tower next to a State Park?
9. What are the restrictions of having a cell tower next to town hiking trails?
10. What are the restrictions of having a cell tower near a historical site such as the East Haven/ Branford trolley?
11. Why don't you use your resources and finances to research a less intrusive manner of getting cell reception instead of a 100ft.+ towers in the middle of neighborhoods that could potentially cause multiple problems to the surrounding residents?
12. How many residents would be affected in the East Haven site compared to the Branford site?
13. How many residents in the East Haven site compared to the Branford site would directly see this tower from their homes?
14. What is the zoning for a 103ft. structure in a residential area? If zoning does not apply, why?
15. Explain electromagnetic energy in its entirety?
16. If this is supposed to be a "public need" than how come the public that it affects most doesn't have a say in it?
17. Will the wildlife be interrupted considering there are hiking trail, woods and a state park directly behind it?
18. I know the Audubon Society was fighting cell towers in State parks, have they been notified of this tower being proposed so close to a State Park? What about migrating birds in the park? I provided a picture of one of the nesting bird directly behind the tower in the state park.
19. How far is the proposed tower from D.C. Moore Elementary School? Is there any zoning limitations for towers and schools?
20. I have heard the grounds behind the fire house have been used for dumping for years. Is this ground sturdy enough to hold a 103ft. structure?
