Re: AT&T
Proposed Wireless Telecommunications Tower Facility
111 Second Hill Road, Bridgewater, Connecticut

Dear First Selectman Stuart:

I am writing to you on behalf of our client New Cingular Wireless PCS, LLC ("AT&T") in connection with the proposed wireless facility at 111 Second Hill Road.

As per my email message to Attorney Ainsworth this past Friday, AT&T's consultants had slated this coming Thursday March 24th to raise a weather balloon to the height of the proposed facility at the captioned address, weather permitting. Given the inclement weather this will not be possible. A float may be possible this Friday, though at this time the forecasted winds do not appear favorable. Our consultants have also set aside March 29th and March 30th as alternate dates for the balloon float just in case. A final determination will be made tomorrow regarding the conditions for a balloon float on Friday the 25th and we will apprise you when we know anything further. Regardless of the ultimate date, the float is expected to take place from approximately 9:00 am until 5:00 pm.

The balloon float will be used to field verify the visibility of a tower at the proposed location. Photographs of the balloon float will ultimately be incorporated into a visual analysis for an application to the Siting Council. The application is not yet filed and this is not the publicly noticed balloon float typically scheduled during a Siting Council site visit but we certainly encourage you and others who may be interested to take look if in Town at this time. In addition, should you have any recommendations about potential locations/views which should be photographed during this balloon float please let me know as soon as possible.

Thank you once again for your time and consideration in this matter. Should you have any questions or need anything further in the interim please do not hesitate to contact me.

Very truly yours,

Daniel M. Laub
