

**PRELIMINARY CTDEEP
COMPLIANCE DETERMINATION**

January 30, 2015

**Verizon Wireless
99 East River Drive
East Hartford, CT 06108**

APT Project No.: CT1412030

**Re: Proposed Plymouth West Relo. Facility
33 Keegan Road
Plymouth, Connecticut**

On behalf of Cellco Partnership and its controlled affiliates doing business as Verizon Wireless, All-Points Technology Corporation, P.C. ("APT") performed an initial evaluation with respect to possible State-listed, threatened or endangered species in order to determine if the proposed referenced communications facility would result in a potential adverse effect to rare species.

APT reviewed the Connecticut Department of Energy & Environmental Protection ("CTDEEP") Natural Diversity Data Base ("NDDB") State and Federal Listed Species and Significant Natural Communities Map for the project area (NDDB Map attached herein) and determined that no potential conflicts exist with species of concern. Based on this information, impact to any potential State-listed Threatened, Endangered or Special Concern Species is not anticipated to result from the proposed Verizon Wireless development. Although not required based on the results of the NDDB map review, APT will be submitting a formal request for rare species review by the CTDEEP for written confirmation. APT will forward the CTDEEP response upon receipt.

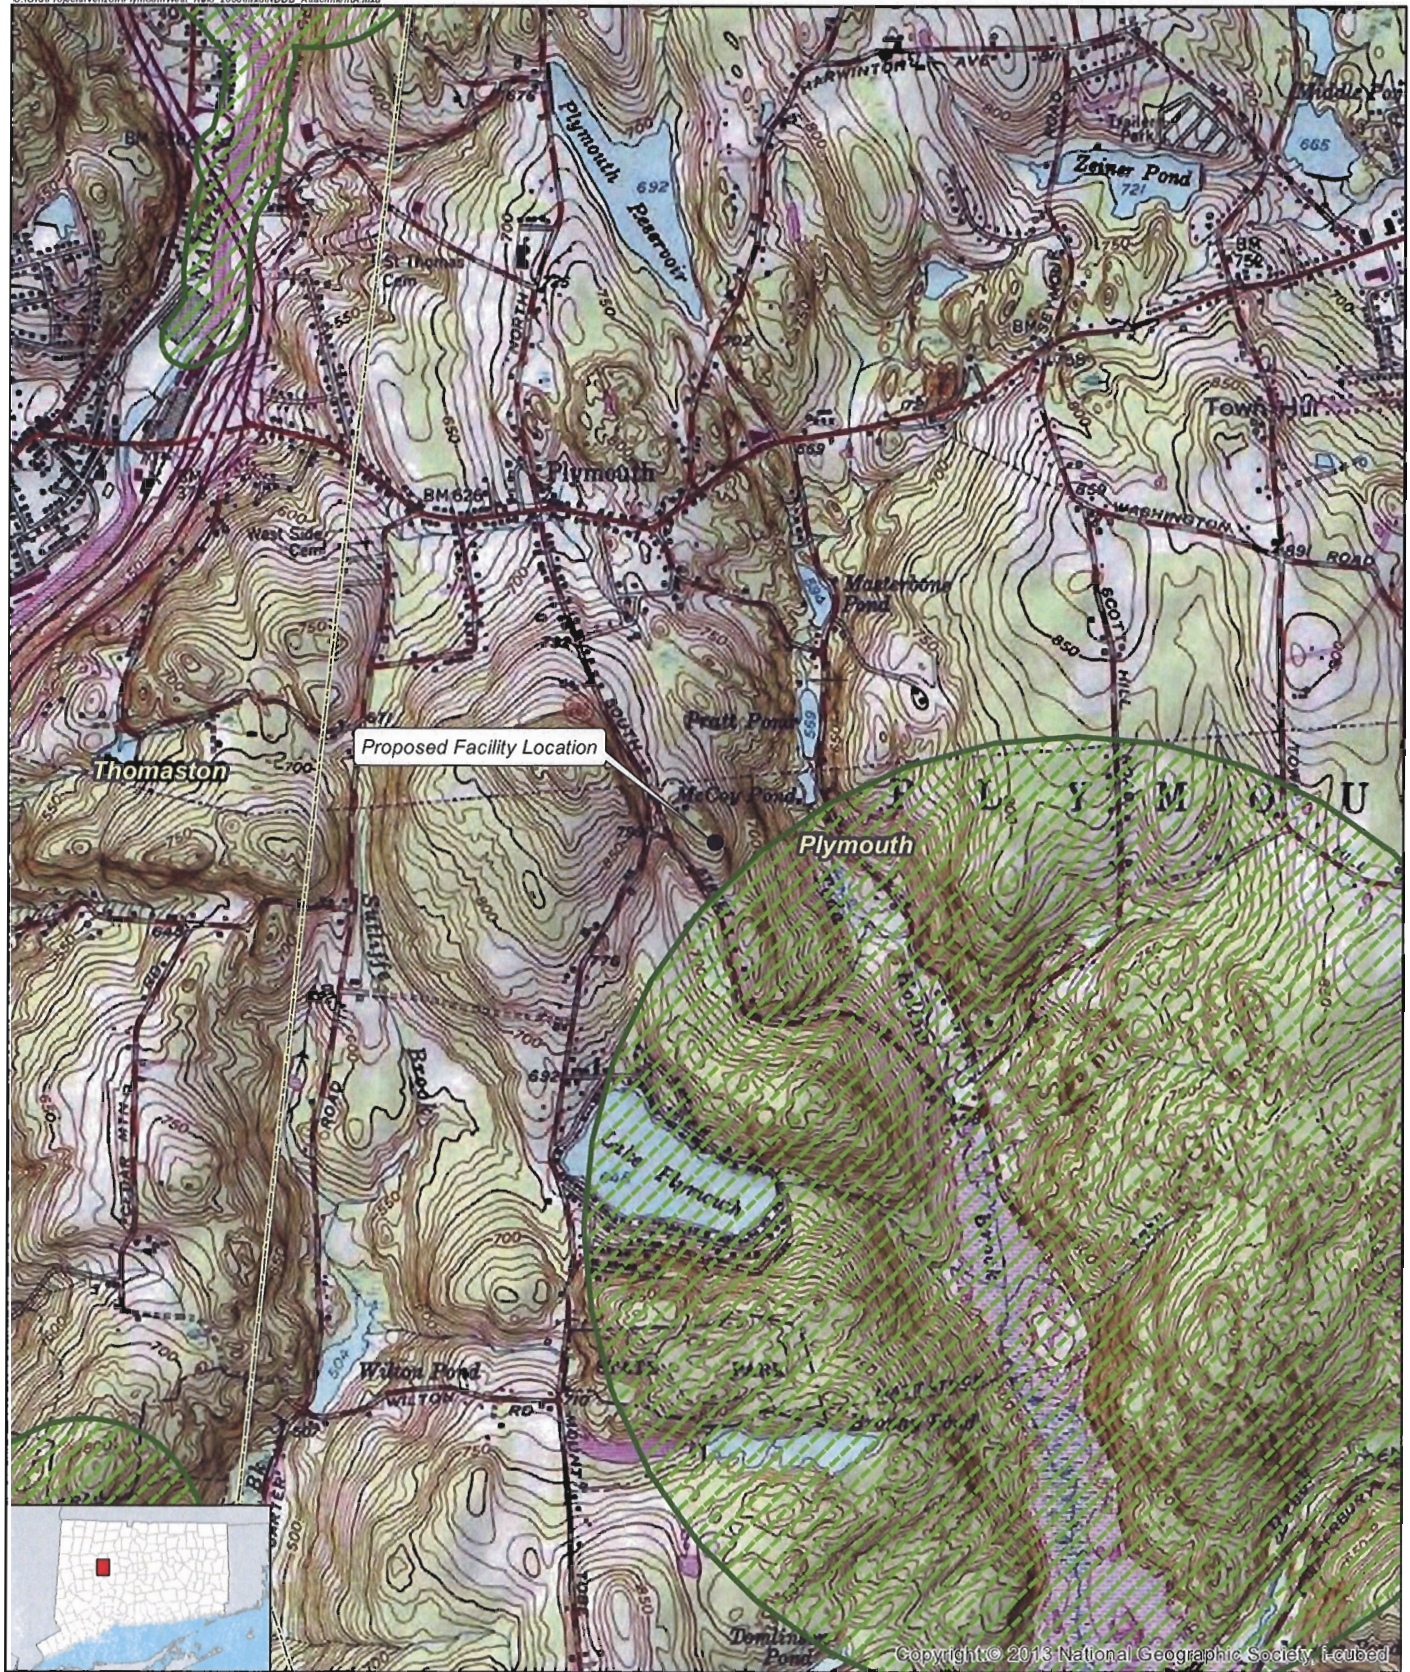

Sincerely,

A handwritten signature in blue ink that reads "Dean Gustafson".

Dean Gustafson
Senior Wetland Scientist
