Re: Proposed Wireless Telecommunications Tower Facility  
63 Woodland Street, Glastonbury, CT

ORIGINAL

Dear Attorney Laub:

This letter is written concerning the Public Hearing held by the Siting Council on Thursday, January 11, 2018 concerning the communications tower proposed for 63 Woodland Street in Glastonbury. As presented at the hearing, the Town of Glastonbury is requesting two considerations. First, that the Town be able to install public safety communications equipment on the new structure at no cost to the community. I understand that you will need to review specifics and we are prepared to discuss with your technical team accordingly. On a preliminary basis, the following potential equipment is identified: three transmit/receive radios, microwave link, steel equipment shelter, and generator.

Second, by unanimous vote of the Glastonbury Town Council, a mono-pine structure is requested. At the hearing, Chairman Stein requests that you provide options for the Town to review and consider.

Please send such information to me directly. The Town Council might ask that you and members of your project team attend a Council meeting to discuss mono-pine options. Many thanks. Should you have any questions, please let me know.

Sincerely,

Richard J. Johnson  
Town Manager
