November 15, 2010

Ms. Linda Roberts
Executive Director
Connecticut Siting Council
Ten Franklin Square
New Britain, CT 06051

Re: Docket No. NT-2010; NRG Energy, Inc.; Petition No. 352

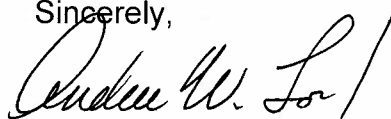

Dear Ms. Roberts:

I write on behalf of NRG Energy, Inc. ("NRG") to provide you with an original and 15 copies of NRG's responses to the interrogatories addressed to NRG by the Connecticut Siting Council regarding the generation units at NRG's Devon Station that were the subject of Petition No. 352. NRG acquired these units from the Connecticut Light and Power Company in 1999.

Please contact me with any questions or requests for additional information. Also, Ms. Julie Friedberg, General Counsel - Northeast Region, is the contact person at NRG. Her contact information is:

Julie Friedberg, Esq.
General Counsel - Northeast Region
211 Carnegie Center
Princeton, New Jersey 08540-6213
Telephone: (609) 524-5232
E-mail: Julie.Friedberg@nrgenergy.com

Sincerely,

Andrew W. Lord

Enclosure

**STATE OF CONNECTICUT
CONNECTICUT SITING COUNCIL**

IN RE:

REOPENING OF FINAL DECISIONS	:	DOCKET NO. NT-2010
PURSUANT TO C.G.S. §4-181A(B) FOR	:	
JURISDICTIONAL NATURAL GAS FIRED	:	
ELECTRIC GENERATING FACILITIES UNDER	:	
C.G.S. § 16-50I(A)(3) AND C.G.S. §16-50K(A)	:	
LIMITED TO COUNCIL CONSIDERATION OF	:	
CHANGED CONDITIONS AND THE	:	
ATTACHMENT OF CONDITIONS TO THE	:	
CERTIFICATES AND DECLARATORY	:	
RULINGS CONSISTENT WITH THE	:	
FINDINGS AND RECOMMENDATIONS IN	:	
THE FINAL REPORT ISSUED BY THE	:	
KLEEN ENERGY PLANT INVESTIGATION	:	
REVIEW PANEL (NEVAS COMMISSION)	:	
AND THE FINDINGS AND	:	
RECOMMENDATIONS IN THE EXECUTIVE	:	
REPORT ISSUED BY THE THOMAS	:	
COMMISSION	:	November 15, 2010

**DEVON POWER LLC RESPONSES TO
NT-2010 INTERROGATORIES
GENERATORS**

1. If the facility has already been constructed, what versions of the NFPA standards were utilized?

NRG purchased the facility from CL&P and cannot confirm what standards were utilized during construction.

2. If the facility has yet to be constructed, what versions of the NFPA standards will be utilized?

N/A.

3. How would recommendation #6, "Recommendation as to adoption of codes" in the Thomas Commission Executive Report affect the facility?

If the recommendations of the Thomas Commission Executive Report are accepted by the Department of Public Safety, the facility will be operated and maintained utilizing the current version of the applicable standards.

Any other, applicable standards mandated by local, state, or federal agencies will also be adhered to by Devon Power LLC.

4. How would the following codes affect construction or modification of the facility:

- a. NFPA 37 (2010 edition)
 - b. NFPA 54 (2009 edition)
 - c. NFPA 54 Temporary Interim Amendment 09-3 (August 25, 2010)
 - d. NFPA 850 (2010 edition)
 - e. NFPA 853 (2010 edition)
 - f. ASME B31;
 - g. ASMEB31.1 Appendices IV and V.
-
- a. **NFPA 37 (2010 edition) – NFPA 37 is the Standard for the Installation and Use of Stationary Combustion Engines and Gas Turbines and would be followed unless the manufacturer of the Combustion Turbines mandates an alternative or more stringent standard.**
 - b. **NFPA 54 (2009 edition) – NFPA 54 currently exempts “fuel gas piping in electric utility plants.” Most of NFPA 54 pertains to much smaller devices and piping than is typically found in power generation facilities and as such much of this Standard is inappropriate for application to construction or modification of the facility.**
 - c. **NFPA 54 Temporary Interim Amendment 09-3 (August 25, 2010) – This amendment details the requirements for purging of gas systems. The purging requirements recommended are minimum standards and more stringent standards, in fact, would be followed as a matter of course during construction or modification of this facility.**
 - d. **NFPA 850 (2010 edition) – NFPA 850 is currently considered “Recommended Practice” and is utilized as a guideline in the operation and maintenance of power generation facilities. If the requirements of this Standard were deemed mandatory, Devon Power LLC would adhere to the applicable sections if construction or modification of the facility was undertaken.**
 - e. **NFPA 853 (2010 edition) – NFPA 853 is the Standard for the Installation of Stationary Fuel Cell Power Systems and is not applicable to construction or modification of this facility.**
 - f. **ASME B31 – ASME Codes B31.1 Power Piping, B31.3 Process Piping and B31.8 Gas Transmission and Distribution Systems will be utilized where applicable for the construction or modification of the facility.**

g. **ASME B31.1 Appendices IV and V – Appendices IV and V are currently non-mandatory appendices. However corrosion protection will be provided, with any construction or modification of existing gas piping per Appendix IV or using an alternate method as allowed for in IV-2.3. Applicable Sections of Appendix V in relation to gas pipeline operations and maintenance are being utilized for post construction operation.**

5. What is useful lifespan of the natural gas piping/pipelines located within and to the facility?

The useful lifetime of the natural gas piping is greater than 40 years.

6. Would the natural gas piping/pipelines within and to the facility need to be replaced during the life of the facility?

It is not anticipated that the piping will be replaced during the lifetime of the facility.

7. Do you foresee any circumstances that would require replacement of a section of natural gas piping/pipeline within and to the facility?

With proper maintenance and corrosion protection it is not anticipated that any of the gas piping will need replacement.

8. If so, would a new section of natural gas piping/pipeline within and to the facility be installed and require cleaning?

If replacement of a section of pipe becomes necessary, it would require cleaning prior to being put into service.

9. What type of material is the natural gas piping/pipeline within and to the facility composed of?

The natural gas pipeline within and to the facility is carbon steel up to the final filtration equipment before the combustion turbines. The piping from the filters to the turbines is stainless steel.

10. How many linear feet of natural gas piping/pipeline are located within and to the facility?

There is approximately 1500 feet of 8" piping installed from the existing gas metering station to the combustion turbines.

11. What is operating pressure (psig) of the natural gas piping/pipeline within and to the facility?

The maximum allowable operating pressure of the gas pipeline to the facility is 1440 psig. Within the facility, the pressure is reduced to approximately 675 psig.

12. What is the nominal pipe size in inches within and to the facility?

The piping from the metering station, through the pressure reducing station and to the combustion turbines, is 8".

13. What is the length in feet of piping/pipeline that requires/required purging within and to the facility?

All of the gas piping or approximately 1500 feet required cleaning.
