

(b) Applicability.

- (1) This section applies to the owner or operator of a fuel burning emissions unit, including a temporary unit, located at a non-major stationary source of NO_x, where:
- (A) The emission unit is listed in Table 22f-1, unless the unit is located at a facility that is subject to RCSA § 22a-174-22e;
 - (B) The unit emits:
 - (i) One hundred thirty-seven (137) pounds of NO_x during any day from May 1 to September 30, inclusive, of any year, if such source is located in a severe nonattainment area for ozone; or
 - (ii) Two hundred seventy-four (274) pounds of NO_x during any day from May 1 to September 30, inclusive, of any year, if such source is located in a serious nonattainment area for ozone; or
 - (C) The unit is an affected unit that is not subject to RCSA section 22a-174-22e.
- (2) The following fuel burning units are not subject to this rule:
- (A) An incineration source subject to an emissions guideline issued under Section 129 of the Act;
 - (B) A simple cycle combustion turbine with a maximum rated capacity of less than five MMBtu/hr;
 - (C) A combined cycle combustion turbine with a maximum rated capacity of less than five MMBtu/hr;
 - (D) A reciprocating engine with a maximum rated capacity of less than three MMBtu/hr;
 - (E) Equipment that combusts fuel for heating materials and that has a maximum rated capacity of less than five MMBtu/hr; or
 - (F) Any other stationary fuel-burning equipment with a maximum rated capacity of less than five MMBtu/hr.
