

Middle Haddam Rodgers Bedrock Compilation Sheet (paper)

Map

NOTICE !

Bedrock quadrangle 1:24,000 scale compilation sheets for the Bedrock Geological Map of Connecticut, John Rodgers, 1985, Connecticut Geological and Natural History Survey, Department of Environmental Protection, Hartford, Connecticut, in Cooperation with the U.S. Geological Survey, 1:125,000 scale, 2 sheets. [minimum 116 paper quad compilations with mylar overlays constituting the master file set for geologic lines and units compiled to the State map, some quads have multiple sheets depicting iterations of mapping]. Compilations drafted by Nancy Davis, Craig Dietsch, and Nat Gibbons under the direction of John Rodgers.

Geologic unit designation table translates earlier map unit nomenclature to the units ultimately used in the State publication.

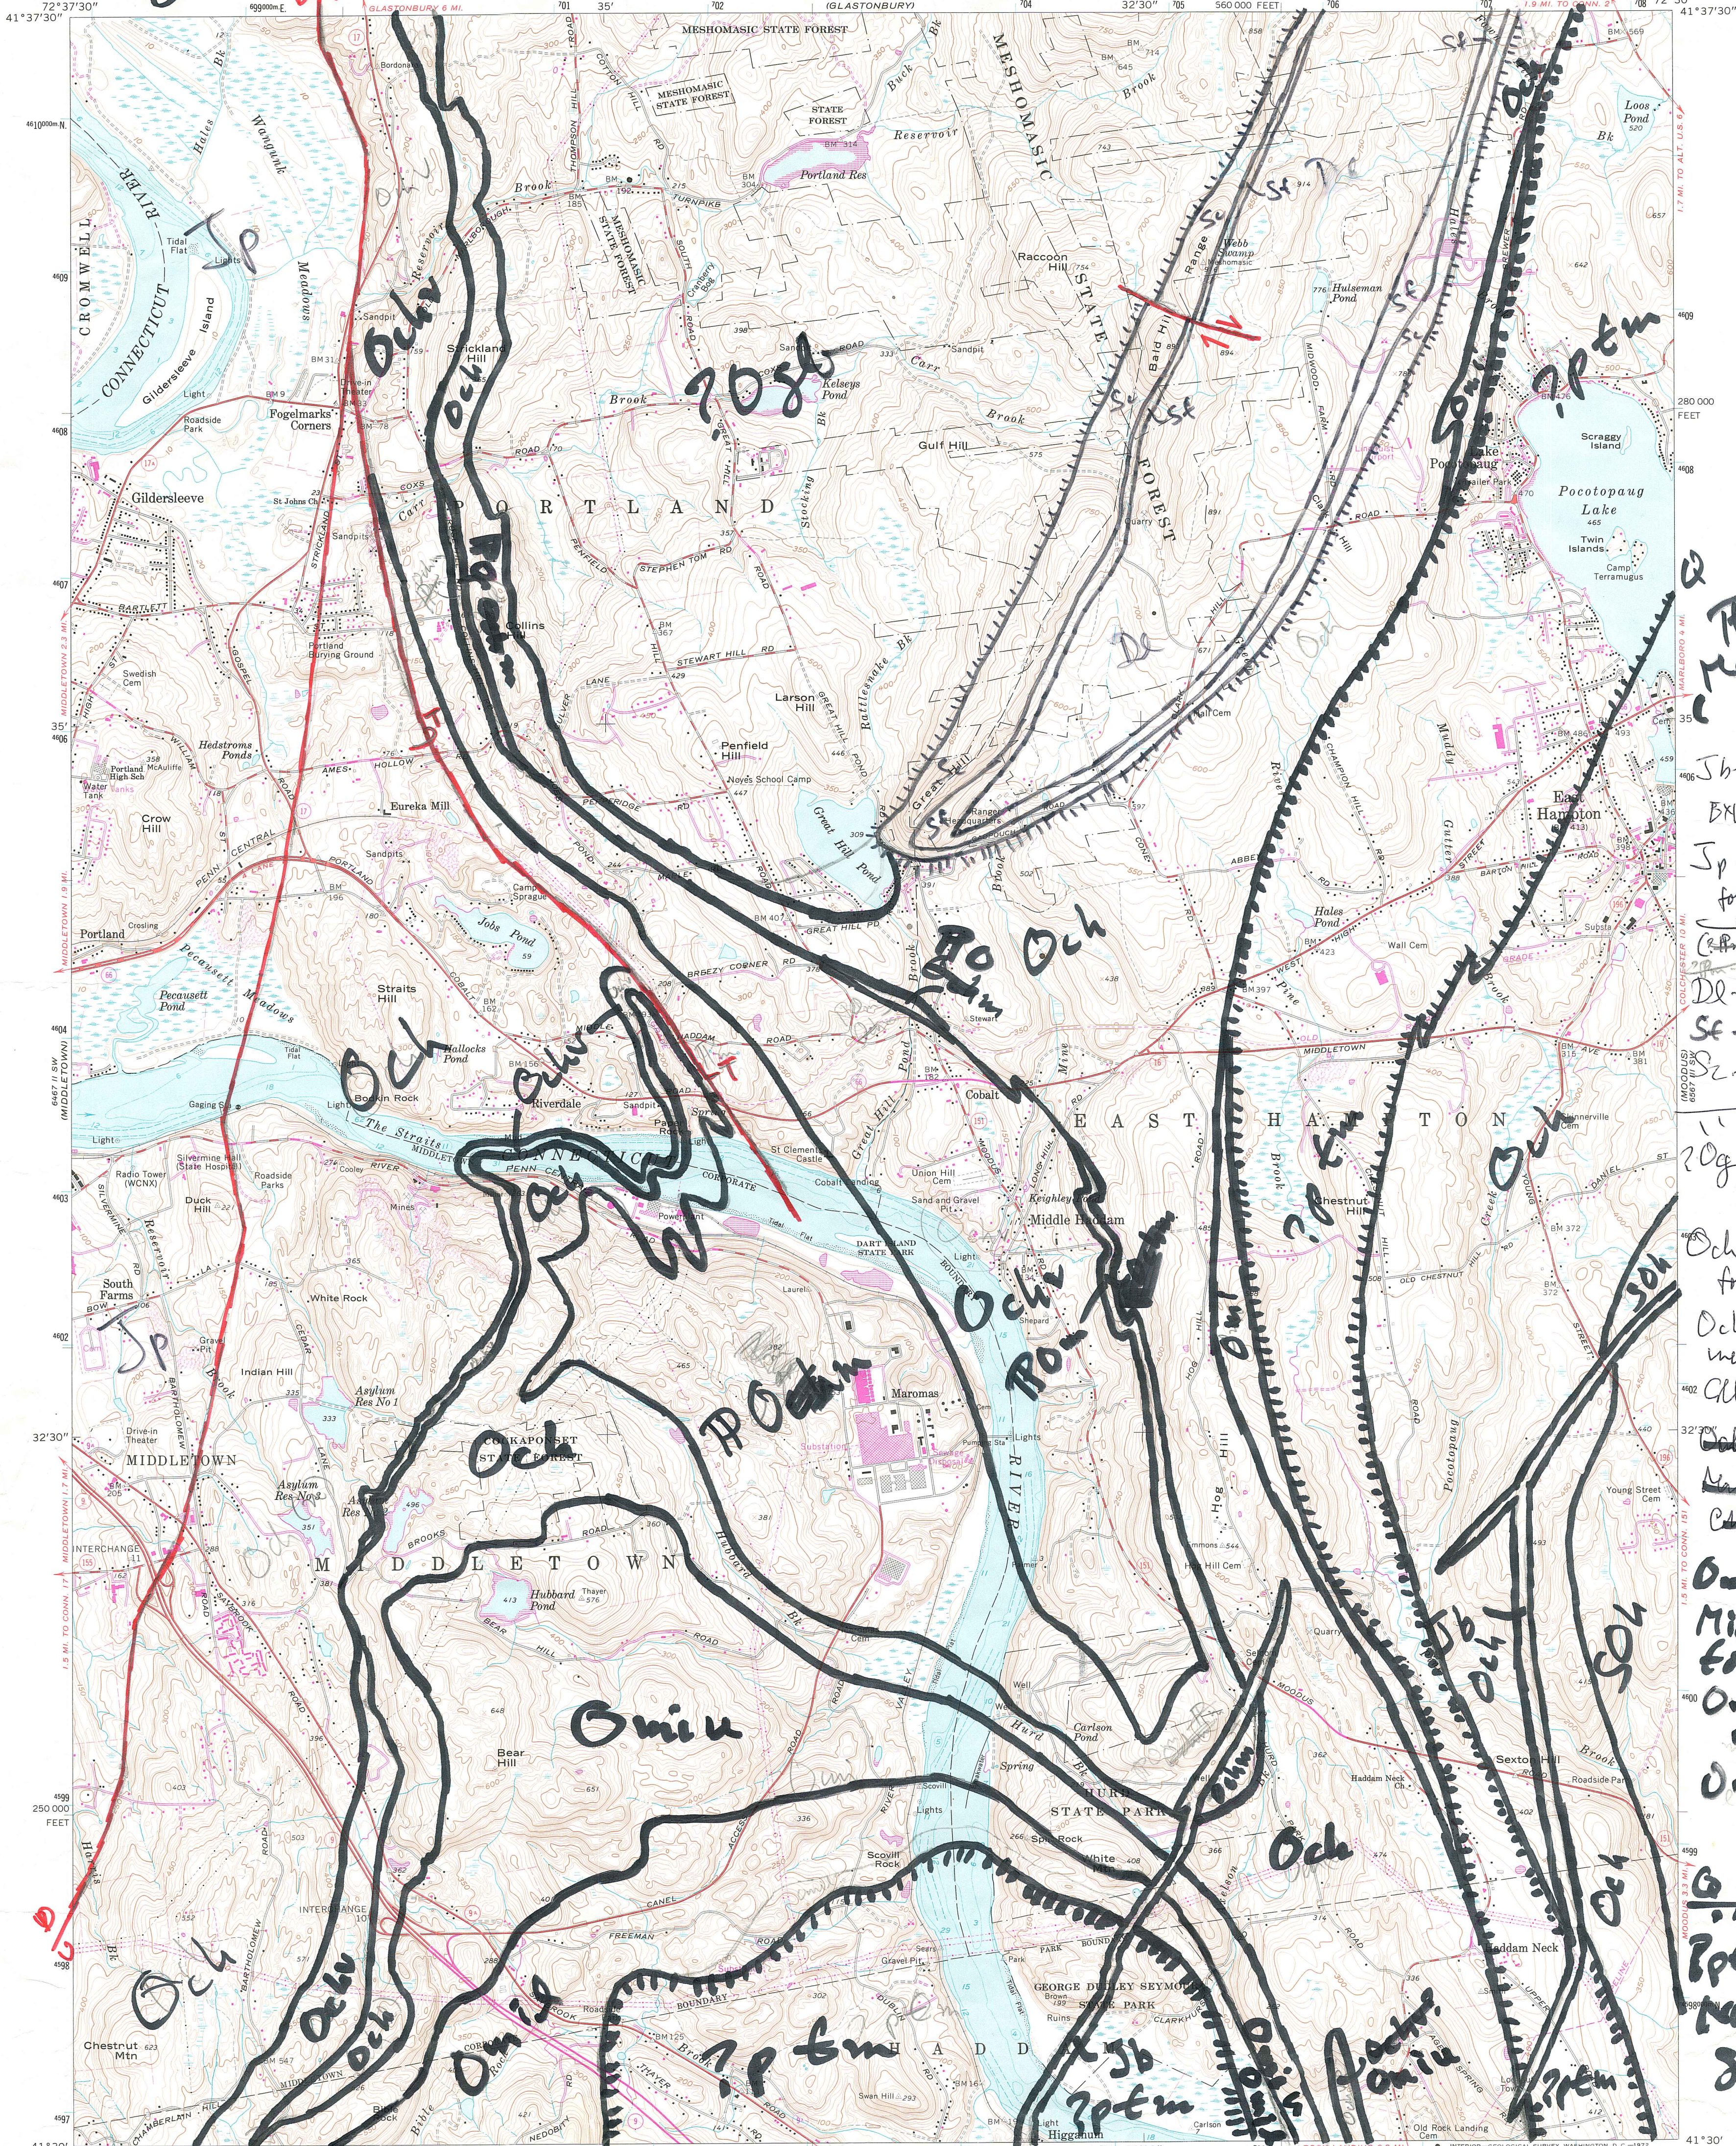

This map set contains unpublished maps, cross-sections, and related information archived by the State Geological and Natural History Survey of Connecticut as part of the Survey Library Collection.

These materials have not been reviewed for accuracy, consistency, or completeness. For many geographic areas, more current information exists, either in published or unpublished form. These materials were developed under research and mapping agreements between the State Geological Survey and individual scientists, academic institutions, or graduate students. The veracity of the information contained within these documents is the responsibility of the authorship. The State Geological and Natural History Survey of Connecticut, does not promote or endorse this content, nor does the State Survey attest as to its level of accuracy.

These materials have been preserved under a cooperative agreement between the State Geological Survey and the US Geological Survey as part of the National Geological and Geophysical Data Preservation Program. www.datapreservation.usgs.gov

These materials are offered in the spirit of open government. Reproduction of these manuscripts was conducted to the highest practical degree, within the parameters of the funding mechanism. Original documents are available for inspection by contacting the Connecticut State Geologist.

Interpretive geology 5-6 July 1978

POm - Marman mass

Sp - Portland formation fault contact

DL - Littleton fm

SE - Fitch fm

SE - Clamh. st.

? Ogl - Glastonbury ss

Och - Elliptical formation

Och - Voleanic member of Glastonbury fm

Och - (?) fm

Marman member of Cobalt Hill formation

Omi - Middle Haddam formation

Omi - Upper member

Omi - Lower member

Rpm - Marman mass

SOh - Heb formation

Mapped, edited, and published by the Geological Survey
 Revised in cooperation with State of Connecticut
 Highway Department

Control by USGS, USC&GS, USCE, and Connecticut Geodetic Survey
 Planimetry by photogrammetric methods from aerial photographs taken
 1941. Topography by planetable surveys 1942-1943. Revised 1961

Selected hydrographic data compiled from USC&GS Charts 266 and
 267 (1962). This information is not intended for navigational purposes

Polyconic projection. 1927 North American datum
 10,000-foot grid based on Connecticut coordinate system
 1000-meter Universal Transverse Mercator grid ticks,
 zone 18, shown in blue

Fine red dashed lines indicate selected fence and field lines where
 generally visible on aerial photographs. This information is unchecked

ROAD CLASSIFICATION

Heavy-duty	Light-duty
Medium-duty	Unimproved dirt
U.S. Route	State Route
