

## Connecticut Registration Report 2012 Errata:

Page 24:

"One in every ~~eight~~ five women who received no prenatal care during pregnancy had a low birth weight baby, and one in every ~~nineteen~~ eleven women gave birth to a *very* low birth weight baby."

Page 26:

"Relative to women who began prenatal care in the first trimester of gestation in 2012 (9.4%), the percent of premature delivery was ~~two~~ three times greater for those who received no prenatal care (19.9 29.9%) and 1.1 times greater for those who began prenatal care during the last trimester at 8.3% (**Table 3**)."

Page 27:

"*Mother's Place of Residence* Towns in Connecticut with a rate of preterm birth significantly higher than the overall state rate were East Hartford (14.7% 14.6%), Hartford (12.7%), New Britain (12.3%), New Haven (11.8% 11.9%) and West Haven (13.0% 13.1%; **Table 3**)."

Page 29 Figure:

Compared to the statewide percentage of ~~13.1~~ 12.6%, the following towns were:

Significantly higher: Bridgeport, East Hartford (added), Hartford, Meriden, New Britain, New Haven, Norwalk, and Waterbury; and Significantly lower: East Haven, Fairfield, ~~Middletown~~, Greenwich (added), Milford, ~~New~~ Milford, Shelton, Trumbull, West Hartford, and Wethersfield.

Page 30:

"An additional ~~330~~ 118 women (0.9 0.3%) received no prenatal care, ~~a 0.6% increase from the previous year~~, which is the same rate as the previous year. Lastly, trimester of initiation of prenatal care was unknown for ~~338-550~~ (0.9 1.5%) of all births in the state. The statewide percentage of late or no prenatal care at ~~13.0%~~ 12.6% was significantly higher than the national percentage not significantly different than 2011 (**Table 11**)."  
[US rates for PNC stats are no longer published by NCHS]

### *"Adequacy of Prenatal Care*

Among all births in Connecticut during 2012 for which adequacy of prenatal care was known, 41.3% of mothers received adequate prenatal care, 35.3% received intensive prenatal care, and 23.4% received non-adequate prenatal care (**Table 4**). The percentage of mothers who received non-adequate care in the state ~~was significantly higher than the nationwide percentage~~ (**Table 11**), and increased significantly from the previous year (22.2% to 23.4%) (**Table 11**). Of note, adequacy of prenatal care was unknown for 2.2% (794) of all births in the state (**Table 3**)."  
[US rates for PNC stats are no longer published by NCHS]

"The rate of late or no prenatal care for non-Hispanic Black/African American and Hispanic/Latino mothers were 20.6% 20.3% and 19.4% 19.3% respectively, compared to only 9.2% 8.5% for non-Hispanic White mothers (**Table 4**), representing disparity ratios of 2.2 2.3 and 2.1 2.3, respectively."

"Of the eight towns with 1,000 or more births in 2012, all exceeded the statewide percentage of late or no prenatal care (13.1 12.6%), accounting for 48.8 49.5% of all the births to women in Connecticut who received late or no prenatal care (**Table 4**)."

Page 31:

"In 2012, 1,654 (4.5%) Connecticut births were to mothers who reported using tobacco during pregnancy (**Table 3** and **Table 11**). This was ~~significantly lower than the national percentage, but was not~~ significantly different from the 2011 rate of 4.6%. (**Table 11**)."  
*[US rates for PNC stats are no longer published by NCHS]*
