TRANSPORTATION ALTERNATIVES PROGRAM (TAP)

The table below is a response to a request during the April 23, 2013 RPO teleconference on the Transportation Alternatives (TA) program. This table contains base annual funding levels for each region in the two years of MAP-21 (FY13 and FY14). CTDOT will be reviewing each regions number one priority to achieve a reasonable scope and estimate to allow for project initiation. Since the annual funding levels are very small, and have sub allocation rules under MAP-21, CTDOT will work with the regions to combine TAP and other sources necessary to fund the construction phase of each project.

Further questions about TAP should be directed to Hugh Hayward and copied to the appropriate CTDOT RPO coordinator.

Thank you.
