

**Inventory of State Real Property
As Required by Public Act 12-205
Submitted by the Office of Policy and Management
March 2013**

Under Section 2 of Public Act 12-205 (i.e. "the Public Act"), the Office of Policy and Management (i.e. "OPM") was made responsible for maintaining an inventory of State real property, both owned and leased. In addition the Public Act requires that, starting March 15, 2013, OPM annually submit copies of the inventories to the joint standing committees of the General Assembly having cognizance of matters relating to government administration and appropriations and the budgets of state agencies. A copy of Section 2 of Public Act 12-205 is included in *Appendix A* of this document.

Currently, in order to produce the most complete inventory of the State's real property it is necessary to combine three (3) separate sources:

1. The State building inventory - contains information on approximately 3,800 structures that are owned by the State of Connecticut. This inventory is currently maintained by the OPM and information is self-reported by the 33 state agencies that have custody and control over State owned buildings. State building inventory data included in *Exhibit 1* of this report was provided to OPM by the state agencies that have custody and control over the buildings.
2. The State leasing inventory - contains information on approximately 170 locations that are leased by the State of Connecticut to meet its realty needs. The information is currently maintained by the Department of Administrative Services (i.e. "DAS") and shared with OPM. In accordance with the requirement of the Public Act, OPM will transition this inventory from DAS to OPM. The lease inventory included in *Exhibit 2* of this report was compiled by the Department of Administrative Services (DAS). As per the Public Act the OPM will begin to compile this information.
3. Payment in Lieu of Taxes (i.e. "PILOT") information - this program provides payment in lieu of local property taxes (PILOT) to municipalities for property owned and used by the State of Connecticut; however, it does not include personal property owned by the State or property used for highway purposes. In February 2013, Governor Dannel P. Malloy proposed the elimination of the PILOT program. The PILOT information can be found in *Exhibit 3* of this report.

Within the confines of existing resources, it is the intention of the OPM to combine these separate data sources into a single, comprehensive inventory.

The Public Act requires OPM to:

1. Identify existing buildings that are of historic, architectural or cultural significance, including buildings listed or eligible to be listed in the national register established under the National Historic Preservation Act of 1966.

This is accomplished as part of the inventory of State owned buildings which includes a field called "*On/Eligible for Historic Register*". The agency with custody and control over the building

is required to determine and report this information to OPM.

2. Identify existing buildings that would be suitable, whether or not in need of repair, alteration or addition, to meet the public building needs of the state or to meet the needs of the public in accordance with the provisions of subsection (m) of section 4b-23.

The OPM does not currently have the resources necessary to make such determination; however, to the extent possible OPM will endeavor, within existing resources, to make improvement in this area over time.

It should be noted that subsection (m) of section 4b-23 does not, speak to the building needs of the State or public but rather that section speaks to renewable energy sources in State buildings. Specifically CGS 4b-23(m) states:

(m) (1) Plans to construct, renovate or modify state-owned or occupied buildings shall provide for a portion of the total planned floor area of newly constructed state buildings or buildings constructed specifically for use by the state to be served by renewable sources of energy, including solar, wind, water and biomass sources, for use in space heating and cooling, domestic hot water and other applications. For the plan due December 1, 1979, the portion to be served by renewable energy sources shall be not less than five per cent of total planned new floor area. For each succeeding state facilities plan submitted after December 1, 1979, the portion of the total planned floor area of any additional newly constructed state buildings or buildings constructed specifically for use by the state to be served by renewable energy sources shall be increased by at least five per cent per year until a goal of fifty per cent of total planned floor area of any additional newly constructed state buildings or buildings constructed specifically for use by the state is reached. For any facility served by renewable energy sources in accordance with this subsection, not less than thirty per cent of the total energy requirements of any specific energy application, including, but not limited to, space heating or cooling and providing domestic hot water, shall be provided by renewable energy sources. The installation in newly constructed state buildings or buildings constructed specifically for use by the state of systems using renewable energy sources in accordance with this subsection, shall be subject to the life-cycle cost analysis provided for in section 16a-38. (2) The state shall fulfill the obligations imposed by subdivision (1) of this section unless such action would cause an undue economic hardship to the state.

While OPM is not aware of what section was specifically intended, subsection (n) of 4b-23 requires the State Facility Plan (www.ct.gov/opm/property) to include various policies including ones to encourage public pedestrian traffic in, through and around State buildings and encourage the public use of State buildings. OPM would request that the General Assembly revise the Public Act to more clearly define the intended section. A copy of CGS 4b-23 is included in *Appendix B* of this document.

Copies of the Inventories – While the Public Act states that OPM shall submit copies of the inventories to the joint standing committees, complete copies of the State building inventory would be in excess of 1,000 printed pages. Therefore summary information for the building inventory is attached. The

complete building inventory, along with the inventory of leased locations and PILOT information is available electronically (Microsoft Excel format) on the OPM website at www.ct.gov/opm/property

Appendix A

Section 2 of Public Act 12-205

Appendix A

Public Act 12-205 – An Act Revising Statutes Concerning the Department of Administrative Services.

Sec. 2. Section 4-67g of the 2012 supplement to the general statutes is repealed and the following is substituted in lieu thereof (Effective July 1, 2012):

(a) The Office of Policy and Management shall be responsible for: (1) Long-range planning with regard to the use of all state real property; (2) determining the level of efficiency of each and every state agency's use of any and all real property under its control; [and] (3) maintaining an inventory of state real property; [to determine the appropriate use of such property] (4) maintaining an inventory of real property leased by state agencies; and (5) determining the appropriate use of state real property.

(b) In creating and maintaining such [inventory] inventories, the secretary shall make recommendations concerning the reuse or disposition of state real property and identify in such [inventory] inventories existing buildings that (1) are of historic, architectural or cultural significance, including buildings listed or eligible to be listed in the national register established under the National Historic Preservation Act of 1966, 80 Stat. 915 (1966), 16 USC 470a, and (2) would be suitable, whether or not in need of repair, alteration or addition, to meet the public building needs of the state or to meet the needs of the public in accordance with the provisions of subsection (m) of section 4b-23. At the request of the secretary, the Commissioner of Economic and Community Development shall advise the secretary as to whether such buildings are of historic, architectural or cultural significance.

(c) All state agencies shall provide the secretary, in the manner and form prescribed by the secretary, with any information requested by said secretary for purposes of maintaining the [inventory] inventories required by this section. [, and shall notify the secretary of any change in ownership regarding state property. The secretary shall update such inventory not less than annually, and shall provide the Commissioner of Administrative Services with a copy of the inventory whenever such inventory is updated. Not later than June 30, 2012, and annually thereafter, the Secretary of the Office of Policy and Management shall submit a copy of such inventory, in accordance with the provisions of section 11-4a, to the joint standing committees of the General Assembly having cognizance of matters relating to government administration and appropriations and the budgets of state agencies.]

(d) The secretary shall update such inventories not less than annually and shall provide the Commissioner of Administrative Services with a copy of such inventories whenever the inventories are updated.

(e) Not later than March 15, 2013, and annually thereafter, the Secretary of the Office of Policy and Management shall submit a copy of such inventories, in accordance with the provisions of section 11-4a, to the joint standing committees of the General Assembly having cognizance of matters relating to government administration and appropriations and the budgets of state agencies.

(f) Each state agency shall request and obtain the written approval of the secretary or his or her designee prior to any (1) change in ownership of state real property, (2) change in use of state real property, (3) use of state real property by an entity other than a state agency, or (4) use of state real property by a state agency other than the state agency with custody and control over such state real property. For purposes of this subsection, "state agency" does not include a constituent unit of the state system of higher education, a vocational-technical school or an agency in the legislative or judicial

branch of state government.

[(d) For] (g) Except as otherwise provided, for the purposes of this section, "state real property" means any improved or unimproved real property owned by a state agency, and "state agency" means any office, department, board, council, commission, institution, constituent unit of the state system of higher education, vocational-technical school or other agency in the executive, legislative or judicial branch of state government.

Appendix B

CGS 4b-23

APPENDIX B

Sec. 4b-23. (Formerly Sec. 4-26b). State facility plan. Implementation. Responsibilities of Secretary of the Office of Policy and Management, Commissioner of Public Works and Properties Review Board. Regulations.

(a) As used in this section, "facility" means buildings and real property owned or leased by the state. The Secretary of the Office of Policy and Management shall establish guidelines which further define such term. All agencies and departments of the state shall notify the Secretary of the Office of Policy and Management of their facility needs including, but not limited to, the types of such facilities and the municipalities or general location for the facilities. Each agency and department shall continue long-range planning for facility needs, establish a plan for its long-range facility needs and submit such plan and related facility project requests to the Secretary of the Office of Policy and Management, and a copy thereof to the Commissioner of Public Works, on or before September first of each even-numbered year. Each such request shall be accompanied by a capital development impact statement, as required by section 4-66b, and a colocation statement, as required by section 4b-31, if the secretary so requires. Each agency and department shall base its long-term planning for facility needs on a program plan. The secretary shall establish a content guide and schedule for such plans. Each agency and department shall prepare its program plan in accordance with such guide and file it with the secretary pursuant to such schedule. Facility plans shall include, but not be limited to: Identification of (1) long-term and short-term facility needs, (2) opportunities for the substitution of state-owned space for leased space, (3) facilities proposed for demolition or abandonment which have potential for other uses and (4) space modifications or relocations that could result in cost or energy savings. Each agency or department program plan and facility plan and its facility project requests shall cover a period of at least five years. The secretary shall provide agencies and departments with instructions for preparing program plans, long-term facility plans and facility project requests and shall provide appropriate programmatic planning assistance. The Commissioner of Public Works shall assist agencies and departments with long-term facilities planning and the preparation of cost estimates for such plans and requests. The Secretary of the Office of Policy and Management shall review such plans and prepare an integrated state facility plan which meets the aggregate facility needs of the state. The secretary shall review the cost effective retrofit measures recommended to him by the Commissioner of Public Works under subsection (b) of section 16a-38a and include in the plan those measures which would best attain the energy performance standards established under subdivision (1) of subsection (b) of section 16a-38.

(b) On or before December first of each even-numbered year, the Commissioner of Public Works shall provide the Secretary of the Office of Policy and Management with a review of the plans and requests submitted pursuant to subsection (a) of this section for consistency with realistic cost factors, space requirements, space standards, implementation schedules, priority needs, objectives of the Commissioner of Public Works in carrying out his responsibilities under section 4b-30 and the need for the maintenance, improvement and replacement of state facilities.

(c) The Secretary of the Office of Policy and Management shall present a proposed state facility plan to the Properties Review Board on or before February fifteenth of each odd-numbered year. Such plan shall be known as the recommended state facility plan and shall

include all leases and capital projects and a statement of the degree to which it promotes the colocation goals addressed in subsection (e) of section 4b-31. The secretary shall establish guidelines defining "capital projects". The Properties Review Board shall submit its recommendations to the secretary on or before March first of each odd-numbered year. The Properties Review Board recommendations shall address the goals described in subsection (e) of section 4b-31. The secretary shall present the recommended state facility plan to the General Assembly on or before March fifteenth of each odd-numbered year.

(d) Upon the approval by the General Assembly of the operating and capital budget appropriations, the Secretary of the Office of Policy and Management shall update and modify the recommended state facility plan, which shall then be known as the state facility plan. The state facility plan shall be used as an advisory document for the leasing of property for use by state agencies and departments and for related capital projects.

(e) Implementation of the state facility plan shall be the responsibility of the Commissioner of Public Works. He shall conduct a study of each proposed facility in the plan to determine: (1) The method of choice for satisfying each such facility need, (2) the geographical areas best suited to such need, (3) the feasibility and cost of such acquisition using a life-cycle cost analysis as established by subdivision (2) of subsection (b) of section 16a-38, (4) the degree to which the plan promotes the goals addressed in subsection (e) of section 4b-31 and (5) any other relevant factors. Said commissioner shall review and approve each facility plan implementation action and shall submit to the Properties Review Board a list of each such action approved and the method and plan by which it shall be accomplished. Said commissioner shall endeavor to locate human services agencies in the same buildings as municipal and private agencies that provide human services. The results of said commissioner's study along with all supportive materials shall be immediately sent to the Properties Review Board. The board shall meet to review the decision of the commissioner and may request the commissioner or any member of his department, and the head of the requesting agency or any of his employees to appear for the purpose of supplying pertinent information. Said board shall call a meeting within two weeks of the receipt of the commissioner's decision, and may meet as often as necessary, to review said decision. The board, within ninety days after the receipt of the decision of the Commissioner of Public Works, shall either accept, reject or request modification of such decision, except that when more time is required, the board may have a ninety-day extension of time, provided the board shall advise the Commissioner of Public Works in writing as to the reasons for such extension of time. If such decision is disapproved by the board, it shall so inform the commissioner along with its reasons therefor, and the commissioner shall inform the head of the requesting agency and the Secretary of the Office of Policy and Management that its request has been rejected. If such decision is approved by the board it shall inform the commissioner of such approval and the commissioner shall immediately communicate his decision to the head or acting head of such governmental unit and to the Secretary of the Office of Policy and Management and shall set forth the procedures to be taken to accomplish the results of such decision. The decision to make public such decision shall rest solely with the commissioner both as to time and manner of disclosure, but in no event shall such period exceed one year. The commissioner shall, when he deems it to be in the public interest, authorize the disclosure of such information; however, in the absence of such authorization, any unauthorized disclosure shall be subject to the criminal provisions of section 4b-27. All decisions made by the commissioner under the provisions of this section shall require review by the board. Except as otherwise hereinafter provided, the approval or disapproval of the Properties Review Board

shall be binding on the commissioner and the requesting agency with regard to the acquisition of any real estate by lease or otherwise, notwithstanding any other statute or special act to the contrary. A majority vote of the board shall be required to accept or reject a decision of the commissioner.

(f) Within forty-five days from the date of the board's decision regarding the request of a governmental unit, the head or acting head of such unit shall notify the commissioner (1) that it accepts his decision, (2) that it rejects his decision and withdraws its request, or (3) that it does not approve such decision and requests that all or part of such decision be modified by the commissioner. When such modification is requested, the commissioner shall, within three weeks from receipt of such request, consider and act upon such request for modification and submit his decision to the Properties Review Board. If the commissioner and the board fail to agree to such modification in whole or in part, the governmental unit may, within ten days from the date of notification of such final decision, accept the commissioner's final decision, reject such decision and withdraw its request, or appeal to the Governor. Upon such appeal, the commissioner shall submit a report to the Governor stating the board's conclusions and supporting material therefor and the governmental agency shall submit a report to the Governor stating its objections to such decision and its supporting material therefor. The Governor shall, within thirty days of the receipt of such reports, make a decision which shall be binding on the parties involved. In the absence of any such appeal or withdrawal of request, the decision of the commissioner and the board shall be final and binding upon the governmental unit.

(g) After final action is taken approving any request or modification thereof, condemnation procedures shall continue to be prosecuted in the same manner as they were on July 1, 1975, by the agency involved, where such procedures are applicable and authorized by statute.

(h) Approval by the Properties Review Board shall not be required prior to State Bond Commission authorization of funds (1) for planning costs and other preliminary expenses for any construction or acquisition project, or (2) for any construction or acquisition project for which an architect was selected prior to July 1, 1975.

(i) As used in this subsection, (1) "project" means any state program, except the downtown Hartford higher education center project, as defined in subsection (l) of section 4b-55, requiring consultant services if the cost of such services is estimated to exceed one hundred thousand dollars or, in the case of a constituent unit of the state system of higher education, the cost of such services is estimated to exceed three hundred thousand dollars, or in the case of a building or premises under the supervision of the Office of the Chief Court Administrator or property where the Judicial Department is the primary occupant, the cost of such services is estimated to exceed three hundred thousand dollars; (2) "consultant" means "consultant" as defined in section 4b-55; and (3) "consultant services" means "consultant services" as defined in section 4b-55. Any contracts entered into by the commissioner with any consultants for employment (A) for any project under the provisions of this section, (B) in connection with a list established under subsection (d) of section 4b-51, or (C) by task letter issued by the commissioner to any consultant on such list pursuant to which the consultant will provide services valued in excess of one hundred thousand dollars, shall be subject to the approval of the Properties Review Board prior to the employment of said consultant or consultants by the commissioner. The Properties Review Board shall, within thirty days, approve or disapprove the selection of or contract with

any consultant made by the Commissioner of Public Works pursuant to sections 4b-1 and 4b-55 to 4b-59, inclusive. If upon the expiration of the thirty-day period a decision has not been made, the Properties Review Board shall be deemed to have approved such selection or contract.

(j) The Properties Review Board shall, within thirty days, approve or disapprove the proposed acquisition by lease of any residential property by the Commissioner of Developmental Services pursuant to subsection (d) of section 4b-3. If upon the expiration of such thirty-day period a decision has not been made, the Properties Review Board shall be deemed to have approved such lease.

(k) Any agency or department of state government requiring additional facilities not included in the state facility plan may submit a request to the Secretary of the Office of Policy and Management outlining the justification for its request. The agency or department shall also provide (1) in the case of a request not previously submitted to the secretary pursuant to subsection (a) of this section, the reasons why it was not so submitted, and (2) in the case of a request so submitted, sufficient new information to warrant reconsideration. Such request shall include a statement of the degree to which the proposed state facility plan promotes the goals addressed in subsection (e) of section 4b-31, if the secretary so requires. Such request shall also be accompanied by a capital development impact statement as required under section 4-66b, if the secretary so requires. Subsections (b) to (d), inclusive, of this section shall not apply to the review of such requests. Any such request for additional facilities which are determined by the Secretary of the Office of Policy and Management to be of emergency nature or the lack of which may seriously hinder the efficient operation of the state, may be approved by the Properties Review Board and the Secretary of the Office of Policy and Management and shall be known as an approval made during the interim between state facility plans. No action may be taken by the state to lease or construct such additional facilities unless the secretary makes such a determination.

(l) The Commissioner of Public Works shall monitor the amount of leased space being requested and the costs of all proposed and approved facility project actions and, in the case of space or facility projects for which bond funds were authorized, shall advise the Secretary of the Office of Policy and Management and the Governor when the space to be leased or the forecast costs to complete the project exceed the square footage amount or the cost levels in the approved state facility plan by ten per cent or more. Approval of the Secretary of the Office of Policy and Management, the Properties Review Board, the State Bond Commission and the Governor shall be required to continue the project.

(m) (1) Plans to construct, renovate or modify state-owned or occupied buildings shall provide for a portion of the total planned floor area of newly constructed state buildings or buildings constructed specifically for use by the state to be served by renewable sources of energy, including solar, wind, water and biomass sources, for use in space heating and cooling, domestic hot water and other applications. For the plan due December 1, 1979, the portion to be served by renewable energy sources shall be not less than five per cent of total planned new floor area. For each succeeding state facilities plan submitted after December 1, 1979, the portion of the total planned floor area of any additional newly constructed state buildings or buildings constructed specifically for use by the state to be served by renewable energy sources shall be increased by at least five per cent per year until a goal of fifty per cent of total planned floor area of any additional newly constructed state buildings or buildings constructed

specifically for use by the state is reached. For any facility served by renewable energy sources in accordance with this subsection, not less than thirty per cent of the total energy requirements of any specific energy application, including, but not limited to, space heating or cooling and providing domestic hot water, shall be provided by renewable energy sources. The installation in newly constructed state buildings or buildings constructed specifically for use by the state of systems using renewable energy sources in accordance with this subsection, shall be subject to the life-cycle cost analysis provided for in section 16a-38. (2) The state shall fulfill the obligations imposed by subdivision (1) of this section unless such action would cause an undue economic hardship to the state.

(n) The recommended state facility plan shall include policies for:

(1) The encouragement of the acquisition, transfer and utilization of space in suitable buildings of historic, architectural or cultural significance, unless use of such space would not prove feasible and prudent compared with available alternatives;

(2) The encouragement of the location of commercial, cultural, educational and recreational facilities and activities within public buildings;

(3) The provision and maintenance of space, facilities and activities to the extent practicable, which encourage public access to and stimulate public pedestrian traffic around, into and through public buildings, permitting cooperative improvements to and uses of the areas between the building and the street, so that such activities complement and supplement commercial, cultural, educational and recreational resources in the neighborhood of public buildings;

(4) The encouragement of the public use of public buildings for cultural, educational and recreational activities;

(5) The encouragement of the ownership or leasing of modern buildings to replace obsolete facilities, achieve cost and energy efficiencies, maximize delivery of services to the public, preserve existing infrastructure and provide a comfortable and space-efficient work environment; and

(6) The encouragement of the establishment of child day care facilities and child development centers including provisions for (A) full-day and year-round programs for children of working parents, (B) opportunities for parents to choose among accredited public or private programs, (C) open enrollment for children in child day care and school readiness programs, and (D) incentives for the colocation and service integration of child day care programs and school readiness programs pursuant to section 4b-31.

(o) Not later than January 1, 1988, the Commissioner of Public Works shall adopt regulations, in consultation with the Secretary of the Office of Policy and Management and the State Properties Review Board, and in accordance with the provisions of chapter 54, setting forth the procedures which the Department of Public Works and such office and board shall follow in carrying out their responsibilities concerning state leasing of offices, space or other facilities. Such regulations shall specify, for each step in the leasing process at which an approval is needed in order to proceed to the next step, what information shall be required, who shall

provide the information and the criteria for granting the approval. Notwithstanding any other provision of the general statutes, such regulations shall provide that: (1) The Commissioner of Public Works shall (A) review all lease requests included in, and scheduled to begin during, the first year of each approved state-wide facility and capital plan and (B) provide the Secretary of the Office of Policy and Management with an estimate of the gross cost and total square footage need for each lease, (2) the secretary shall approve a gross cost and a total square footage for each such lease and transmit each decision to the requesting agency, the commissioner and the State Properties Review Board, (3) the commissioner shall submit to the secretary, for approval, only negotiated lease requests which exceed such approved cost, or which exceed such approved square footage by at least ten per cent, and (4) the secretary shall approve or disapprove any such lease request not more than ten working days after he receives the request. If the secretary fails to act on the request during such period, the request shall be deemed to have been approved and shall be forwarded to the board.

Exhibit 1
State Owned Buildings

| Agency | Building Name | Address | City | State | Zip | County | Year Built | Condition | Notes |
|--|------------------------------------|----------------------------------|--------------|-------|-------|-------------|------------|-----------|-------|
| Southern Connecticut State University | Office Building 1 | 347 Madison Avenue, New York | New York | NY | 10017 | Westchester | 1984-7120 | No | |
