Training or
Web-Based
Training

The Cellebrite Certified Operator (CCO) course is a 2-day intermediate level certification program which builds on the concepts from the CMFF course and is designed for those participants who are tasked with extracting data in a forensically sound manner using UFED Touch or UFED 4PC.

This course is designed to teach data extraction team members such as technically savvy investigators, digital forensic examiners, IT staff, internal affairs investigators, first responders and personnel designated to handle extraction of digital evidence how to perform extractions on a variety of devices. These extractions include logical, file system and physical extractions from mobile devices as well SIM cards, and external storage such as SD cards.

Participants in this course will gain a basic understanding of how to open the extractions in Physical Analyzer software, conduct basic searches and how to create bookmarks and reports. Students achieve the CCO certification upon passing a knowledge test and practical skills assessment with a score of 80% or better. The only way to earn this CCO certification is by taking the exam along with an associated course, there is no test out available.

Training

The Cellebrite Certified Physical Analyst (CCPA) course is a 3-day advanced level program designed for technically savvy investigators, digital evidence analysts and forensic practitioners. As this course focuses on the analysis and advanced search techniques using UFED Physical Analyzer, participants will NOT be conducting extractions from devices in this course. UFED Physical Analyzer software will be used extensively to explore recovered deleted data, database contents, advanced search and analysis techniques, verification and validation, and reporting.

Students will achieve the CCPA certification if they take and pass a knowledge test and practical skills assessment with a score of 80% or better. The only way to earn the CCPA certification is by taking the exam along with an associated course, there is no test out available.

It is strongly recommended that students in this course complete the Cellebrite Mobile Forensics Fundamentals (CMFF) course or test out, as well as the Cellebrite Certified Operator (CCO) course prior to attending.
