Creating Cross Sections

1. Create a new file for your final cross sections **HW_MSH_Proj#_XSC-1.dgn**

2. Open the Create Cross Section dialog box and load the InRoads Preference
   2007 CTDOT Border Format. Select the **Spacing Tab**. For the cell name select
   Contact_BDR_XSC. Below is an InRoads screen-shot of the Spacing Tab on the Create Cross
   Section dialog box (Fig.5-27).

3. Follow the prompts.
   This cell is being pulled into this list from the cell library CTDOT_Standards workspace
   \CTDOT_Standards\Standards\cell\CT_xsection_border.cel. If you do not see the cell
   Contact_BDR_XSC please refer to (Fig.5-3) of
   http://www.ct.gov/dot/lib/dot/documents/deng/CTDOT_DDE_GUIDE.pdf.
