

Norfolk, Conn.

Seed mimeo. sent '44

Mr. Charles Garside
15 Broad Street
New York City

3/4/38 - Has 250-acre farm in southerly half of Norfolk.

3/15/38 - 30 FP-616 *C. mollissima* trees

10/21/44 - Trees not successful. Most of them died.
The half dozen surviving never yet produced
nuts. More like bushes than trees.
Trees die back each yr. Altitude may be
cause (1500 ft) + quite severe winters.

5/5/46 3 or 4 trees remaining which show promise.
Mr. Garside's opinion is that they are poorly
situated and should be moved to better location.
