

Prof. G. W. Smith
E. Ky. State Normal,
Richmond, Ky.

Ky.
Chestnut Orchard Forest

Has 25 acres grafted chestnuts, (according Davis?)
June 1927. He has a 200 acre farm near Conway in Rockcastle
Co. grows fruit. His chestnuts growing in natural wood land
on uncleared 100 acres. Bearing only as wild trees and he
believes they have no blight. Estimates 500 trees. Farm is 20
miles from Richmond. I did not see it. Could not determine if
Smith would know the blight if he saw it. - Strong.
Sept. 1, 1951 - Winter injury memo returned
with note that Prof. G. W. Smith was dead.
