

CHATTANOOGA, TENN.

Paul Sells

11/6/51--He has roughly some 700 trees, forest planted in three localities. Originally started with some 1200 1-year-old seedlings but lost heavily to severe hail storm in 1949. Very little trouble with brush or grass fires; most serious threat to nocturnal animals in late fall and during winter which cut the stems down within 1/2 inch of ground. Letter answered by Berry as GFG in Europe.
