

Peru, Indiana
Wallick and Kaufman
Wallick Road

Origin of plants from which they secure seed:

19 from Stoke in 1945
10 from Eastern Shore Nurseries in 1946
5 from Buck-Ohio in 1946
44 from J. F. Jones in 1947
19 from Betnon-Smith in 1947

11/18/55 - "All our trees are seedlings. We have never been able to grow a grafted tree longer than two years. This was also the experience of many at the N.N.G.A. meeting at Rochester, New York.

Peru, Indiana

Mr. Ford Wallick
Rural Route # 4

From letter from W. B. Ward, Extension Horticulturist, Agricultural Extension Service, Lafayette, Indiana, dated July 19, 1956. "We have another nut enthusiast in the state, Mr. Ford Wallick, R. R. 4, Peru, Indiana. Mr. Wallick has 25 acres planted to various nut seedlings and approximately 100 acres planted to named varieties. His interest in the work is mostly for the developing of seedlings of promise and here again he will have some Persian or English walnuts that have good size, good quality, and good bearing habits. Here is another chance to test something that could be worthwhile."
