11/28/33 - No report by J. Smulke on these

This report is as of October 14, 1925 when this consignment was discarded because of the poor showing the trees were making. The shipment arrived in poor condition, and although the trees were set in nursery beds and given intensive care, they never flourished. This site up in the hills however is unfavorable to nearly all broadleaf trees due to late and early frosts and cold nights.

Mr. T. T. Munger
