10 lbs *C. mol.* seed #66037

8/25/47 - Dr. McKay (Nat Investigations) was on a recent trip to the Pacific coast & stopped off at Moyer's nursery. He said that the trees there progress & two American selections are very large & producing tremendous crops of nuts. He has one especially good Chinese chestnut, 10 yrs. old, about 20 feet high that is bearing well. He also has some 12 yr. old No. 6's.
